Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

FIELD ENGINEERS REPORT

Six Shooter Dry Placer Claims

Mine THOMAS CLAIMS Date July 12, 1961

District GLOBE DISTRICT, GILA COUNTY Engineer Lewis A. Smith

Subject: Interview with Alex Thomas, 1017 East Apache, Phoenix, Arizona

Owner: Alex Thomas, 1017 East Apache, Phoenix, Arizona (Deceased)

Location: Sec. 24, T1S, R~~16~~15E.

Mineral: Gold

Property: 2 placer claims.

The gold occurs in intermittent clay lenses on the bedrock of granite. The stream bed is about 7 feet wide. The gold is angular, coarse, and not too rounded, indicating relatively little transportation. Thomas plans to "chase" the placer up stream to try and find its source. He stated that the side gullies yielded only small amounts of fine, or "flower" gold and that came close to the confluence of these side gullies with the main stream. The granite, where exposed on both sides of the stream in this area, did not appear to be appreciably mineralized. He also stated that his southern most claim adjoins a claim owned by other persons. He has permission to work their claim in addition to his own. The stream trends and runs northeast, and lies 1 mile west of the Christmas-Globe highway and 5 miles south of the Highway 70 Junction.
