Arizona Department of Mines and Mineral Resources Mining Collection

## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES  
STATE OF ARIZONA  
FIELD ENGINEERS REPORT

Mine American Coarse Gold Placers Date February 20, 1962  
District La Paz-Quartzsite Dist. Yuma Co. Engineer Lewis A. Smith  
Subject Interview with Ben Scott, 2936 N. 36th St. (Telephone 279-3427), Agent.

Property: 13 claims (280 acres) 2 40 acre association claims.  
7 claims originally owned by one party and 12 by another (6 claims dropped).  
Location: Adjoins Oro Fino and Middle Camp placers (1/2 mile north of Highway 60-70)  
(approximately Secs. 27-28, 33-34, T. 4 N., R. 20 W.) 1 mile SW of the old  
Marquette Mine).

Work: Several trenches and 5 - 6 foot pits.

Mineral: placer gold

Tests: The composite samples from 100 pits and trenches assayed \$1.70 and the individual samples ranged from \$0.60 to \$12.00. The gravels vary from 0 to 20 feet thick and overburden is negligible. The gravels overlie Pre-Cambrian schists which contain numerous small veins of quartz. The individual gold grains range from 1/64 to 1/4 inch in diameter. The percentage of flower gold is believed by Scott to be relatively small. The sample locations are well dispersed over the property according to the assay map.

Plans: Scott stated that he had a front loader and a small cat. He plans to acquire screens and a dry washer or if water can be developed at Quartzsite, a wet table will be used.
