ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ARIZONA DEPARTMENT OF ENVIRONMENTAL QUALITY

EVAN MECHAM, GOVERNOR

NOTICE OF INTENT TO (ISSUE) (A) GROUNDWATER QUALITY PROTECTION PERMIT(S)

Pursuant to Arizona Compilation of Rules and Regulations, Title 9, Chapter 20, Article 2 the Director of the Arizona Department of Environmental Quality intends to (issue) (a) Groundwater Quality Protection Permit(s) to the following applicant(s), subject to certain special and general conditions.

Public Notice No. 93-87AZGW Big Hill Mine : (ALIZONA CULD AS TER) October 29, 1987

P.O. Box 649

Congress, Arizona 85332

Township 11 North, Range 7 West, Section 15 Groundwater Quality Protection Permit No. G-0047-13

The applicant shall operate a mining and milling operation which shall recover precious minerals through a flotation mill using biodegradable reagents. The facility is located on State Land in the Santa Maria Subbasin, approximately 4 miles west of Date, Arizona in Yavapai County. The facility is located outside the main water bearing area.

The permit (application)(Notice of Disposal) is available for public review Monday through Friday, 8:00 a.m to 5:00 p.m. at Arizona Department of Environmental Quality, Water Permits Unit, 2005 North Central Avenue, Phoenix, Arizona 85004.

Persons may submit comments or request a public hearing on the proposed action, in writing, to ADEQ at the above address within thirty (30) days from the date of this notice. Public hearing request must include the reason for such request.

May 5, 1952 Date

District Sec. 15 & 22, T 11 N., R. 7 W. 25 miles west of Congress Present status

Mark Gemmill Engineer

Subject:

It had been reported that in addition to gold this property contained Tungsten. L. L. Huthmacker of Wenden was interested in looking at it and he went with me to look at it. I was unable to locate Mr. Rawson who was President of the company.

There is a large vein of quartz showing for several claim lengths in spots. This has been propected in a number of places with shallow workings and cuts. Also there is a Xcut tunnel which taps the vein at about 75' depth. At this point drifts were run both ways, and a winze was sunk. We were unable to explore these workings as there was considerable caving at the intersection of Xcut and the vein and directly over the winze.

We examined surface croppings and dumps and found very little Tungsten anywhere. As the cold values are reportedly low no samples were taken for gold assay. We panned a number of pieces of quattz without favorable result.

I do not know whether or not assessment work has been performed in recent years.

So far as tungsten is concerned we found nothing worth propecting. It would be neccessary to do considerable sampling and assaying to determine its possibility as a gold mine.
