Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ADMMR BEAU FILE

BEAU

MARICOPA COUNTY

NJN WR 1/23/87: The exploration project at the Tonapah-Belmont (file) Maricopa County is a consortium of the Canadian companies Lakeshore Minerals (c) and Platinum & Gold Resources. The BLM microfiche list the Tam and Beau with Tamoco, 101 N. 1st Avenue, Suite 2600, Phoenix, Arizona 85003. The claims additionally cover Maricopa MILS 74 Unknown Adit (change name to Beau) T3N R7W Sec 3. An employee of the firm reported that the adits are open and are cross cutting, mostly altered, but some mineralized areas of intrusive breccias hosted by gneiss and schist. Although some drilling is currently taking place near the Tonapah-Belmont, activity at the Maricopa MILS 74 consists of geochemical sampling and geologic mapping.
