Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine **BIG STEVE MINE**

Date **May 13, 1966**

District **PAJARITO**

Engineer **G. W. IRVIN**

Subject: **Mine Visit.**

REFERENCES - None .

LOCATION- In the north half of section 2: R12E; T24S; . This mine is located on the north side of Walker Canyon at an elevation of approximately 4200 feet.

DLAIMS - 4 Status not known. This is the same group of 4 claims that includes the WHITE OAK MINE see report of same date.

OWNER- Mr. W. H. Clarke of Nogales (Ruby Road).

LEESEES - Name not known at present time.

PRESENT ACTIVITY- A little work underground from the adit level had recently been done, and may still be active. Two small portable compressors were near the tunnel portal, probably 300 or 400 cubic feet capacity total. A wheel barrow had been used to tram muck from the adit to the dump.

ORE- Could see nothing of value in the material on the dump, but do not know where the material came from.

MINE WORKINGS- The main adit was all that was visited, it is near the top of the ridge and has been driven northerly to intersect the vein. Vein not examined.

PAST HISTORY- Not known.
