Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

BIGGER HILL CINDER PITS

APACHE COUNTY

KAP WR 10/2/87: A visit was made to the Bigger Hill Cinder Pits in Sec 18, T8N R28E in Apache County. It is listed in Apache County MILS as Greer No. 1 Borrow Pit, it is not however a borrow pit. Reddish brown and dark grey to black volcanic cinders or scoria have been produced from two pits, the east pit and the west pit. Both pits have yielded a few thousand cubic yards of material and have not been active for at least a few years. Photographs were taken of the east pit.
