Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

tendered. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 135830, filed July 15, 1971. Applicant: DAYTON DELIVERY, INC., CMD 11, Box 103, Fairborn, OH. Applicant's representatives: James R. Stivers and Edwin H. van Deusen, 50 West Broad Street, Columbus, OH 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages and related advertising materials*, from Frankenuth, Mich., and Belleville, Ill., to Dayton, Ohio; and (2) *milk cartons*, from Crossett, Ark., and Versailles, Ky., to Dayton, Ohio. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 135831, filed July 15, 1971. Applicant: NIL GIRARD TRANSPORT, LTEE., 485 rue St. Philippe Street, Chicoutimi, PQ Canada. Applicant's representative: Frank J. Weiner, 6 Beacon Street, Boston, MA 02108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber*, from the ports of entry on the international boundary line between the United States and Canada located in Maine, New Hampshire, Vermont, and Rouses Point, N.Y., to points in Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, and Pennsylvania, restricted to traffic originating at points in Dubuc County, Quebec, Canada. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Augusta, Maine, or Boston, Mass.

No. MC 135832, filed July 8, 1971. Applicant: WILLIAM L. HOLLAND, 3928 West Orange Drive, Phoenix, AZ 85019. Applicant's representative: Donald E. Fernaays, 4114 A North 20th Street, Phoenix, AZ 85016. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Mica*, from the mine and processing site of Space Minerals, Inc., at a point 7 miles east of the junction of U.S. Highway 93 and Arizona Highway 97, on Highway 97, in Yavapai County, Ariz., to San Francisco, and San Diego, Calif., points in Los Angeles, Orange, San Bernardino, and Riverside Counties, Calif.; Duncan and Muskogee, Okla., and Houston and Fort Worth, Tex.; and (2) *equipment, materials, and supplies* used in mining and processing mica, from points in Los Angeles, Orange, San Bernardino, and Riverside Counties, Calif., to the mine and processing site of Space Minerals, Inc., located as described in (1) above, under contract with Space Minerals, Inc. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Phoenix, Ariz.

No. MC 135825, filed July 9, 1971. Applicant: PANHANDLE FREIGHT SYSTEM, INC., 109 East Jefferson, Elk City, OK. Applicant's representative: R. L. Dugger (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, classes A and B explosives, household

goods as defined by the Commission, commodities in bulk), between (1) Denver, Colo., and Lawton, Okla., from Denver over U.S. Highway 287 to Boise City, Okla., thence over Oklahoma Highway 3 and U.S. Highway 281 to Lawton, and return over the same route, serving the intermediate points of Woodward, Seiling, Watonga, Anadarko, and the off-route points of Mooreland, Fairview, El Reno, Apache, Cyril, and Fort Sill Military Reservation, Keyes and Chickasha, Okla.; and (2) between Denver, Colo., and Eldorado, Okla., over the above route to junction U.S. Highway 270 and Oklahoma Highway 34, thence south over Oklahoma Highway 34 to Eldorado, and return over the same route, serving the intermediate points of Mangum, Elk City, Hammon, Vici, and the off-route points of Altus, Hobart, and Cordell, Okla. **NOTE:** If a hearing is deemed necessary, applicant requests it be held at Elk City, Lawton, or Oklahoma City, Okla.

MOTOR CARRIER OF PASSENGERS

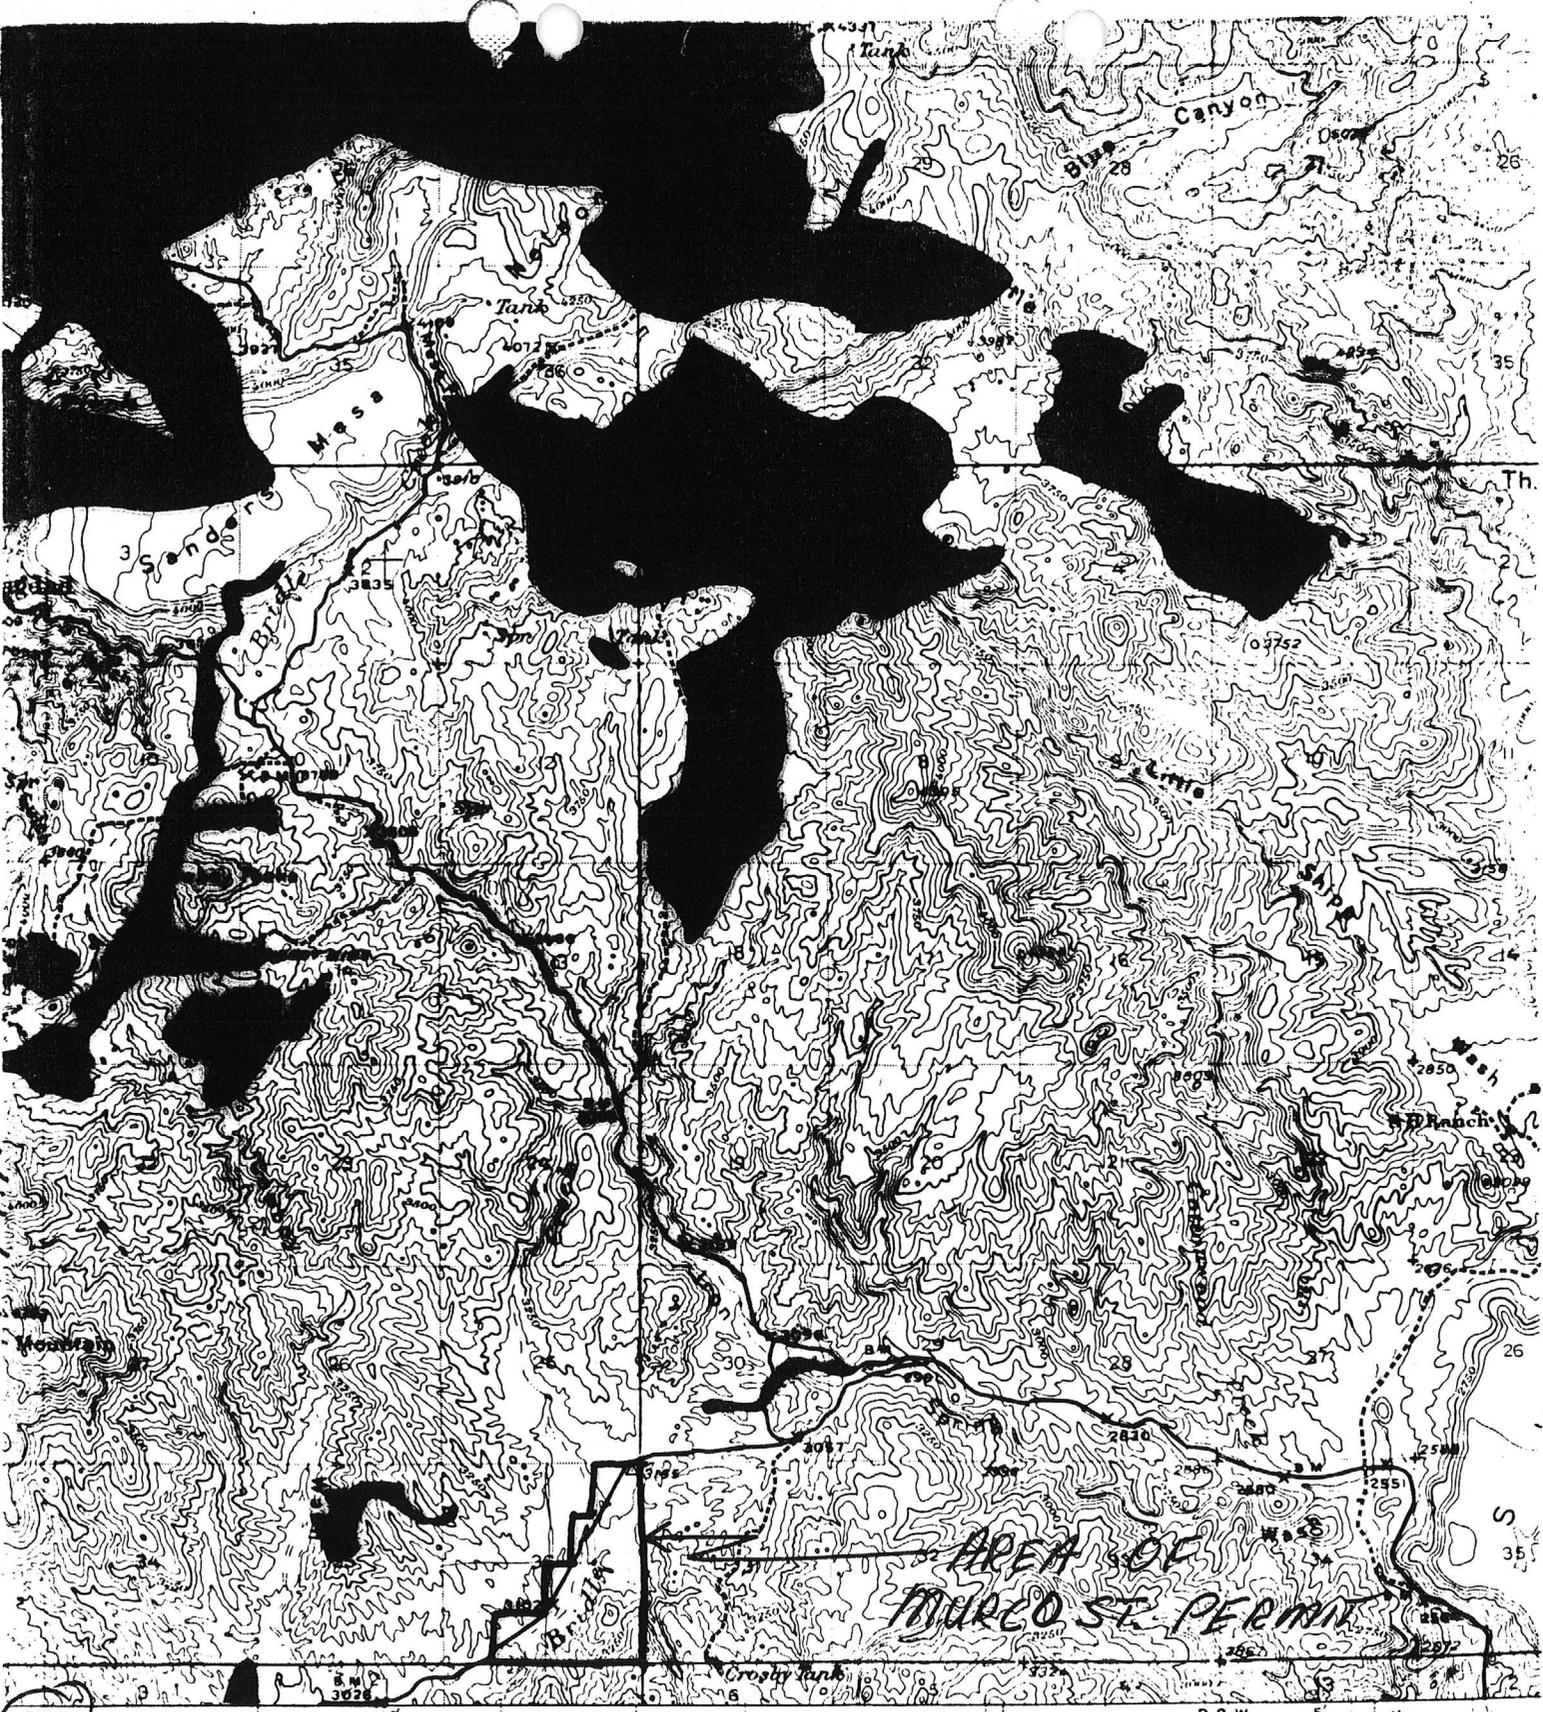

No. MC 1515 (Sub-No. 169), filed July 6, 1971. Applicant: GREYHOUND LINES, INC., 1400 West Third Street, Cleveland, OH 44113. Applicant's representative: Barrett Elkins (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular and irregular routes, transporting: *Item A—Regular Routes: Passengers and their baggage and express and newspapers* in the same vehicle with passengers, (Route 1) between the junction of Florida Highway 528 and U.S. Highway 441 and the junction of Florida Highway 528 and Interstate Highway 4, serving all intermediate points: From the junction of Florida Highway 528 and U.S. Highway 441 over Florida Highway 528 to the junction of Interstate Highway 4, and return over the same route; (Route 2) between the junction of Interstate Highway 4 and Florida Highway 557A and the junction of Florida Highway 557 and U.S. Highways 17 and 92, as an alternate route for operating convenience only, serving no intermediate points: From the junction of Interstate Highway 4 and Florida Highway 557A over Florida Highway 557A to the junction of Florida Highway 557, thence over Florida Highway 557 to the junction of U.S. Highways 17 and 92, and return over the same route; (Route 3) between the junction of U.S. Highway 1 and Interstate Highway 95 (south of St. Augustine, Fla.) and the junction of Interstate Highway 295 and County Road No. 553 (Jacksonville Heights Road), as an alternate route for operating convenience only, serving no intermediate points: From the junction of U.S. Highway 1 and Interstate Highway 95 (south of St. Augustine) over Interstate Highway 95 to the junction of Interstate Highway 295, thence over Interstate Highway 295 to the junction of County Road No. 553 (Jacksonville Heights Road) and return over the same route; (Route 4) between Melbourne, Fla., and Cocoa, Fla., serving all intermediate points: From Melbourne over Florida Highway 516 to the junction of Florida Highway A1A, thence over Florida Highway A1A

to the junction of Florida Highway 520, thence over Florida Highway 520 to Cocoa, and return over the same route; (Route 5) between Port Canaveral, Fla., and the junction of Florida Highway 528 and Florida Highway 520, serving no intermediate points, but serving the junction of Florida Highway 528 and U.S. Highway 1 and the junction of Florida Highway 528 and Interstate Highway 95 for the purpose of joinder only: From Port Canaveral over unnumbered access road to the junction of Florida Highway 401, thence over Florida Highway 401 to the junction of Florida Highway A1A, thence over Florida Highway A1A to the junction of Florida Highway 528, thence over Florida Highway 528 to the junction of Florida Highway 520, and return over the same route.

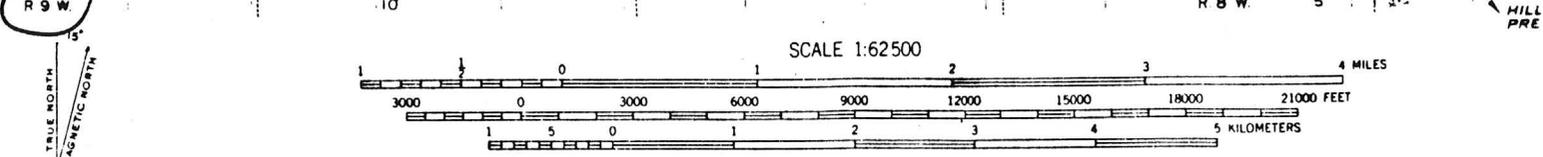

Item B—Irregular Routes: Passengers and their baggage, in one way and round trip charter operations, originating at points on Routes Nos. 4 and 5 described in Item A above, and extending to points in the United States, including Alaska (but excluding Hawaii); *Item C—Irregular Routes: Passengers and their baggage*, in one way and round trip charter operations, originating at points on the route specified below and extending to points in the United States, including Alaska (but excluding Hawaii): From St. Petersburg, Fla., over U.S. Highway 19 to its junction with U.S. Highway 41, thence over U.S. Highway 41 to its junction with U.S. Highway 41-Business, thence over U.S. Highway 41 and U.S. Highway 41-Business to their junction south of Bradenton, thence over U.S. Highway 41 to Naples, thence over Florida State Highway 84 (also known as Alligator Alley or Everglades Parkway) to Fort Lauderdale, Fla. **NOTE:** Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Orlando, Fla.

No. MC 59238 (Sub-No. 65), filed July 6, 1971. Applicant: VIRGINIA STAGE LINES, INCORPORATED, 114 Fourth Street SE., Charlottesville, VA. Applicant's representative: James E. Wilson, 425 13th Street NW., Washington, DC 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage, and express and newspapers* in the same vehicle with passengers, between Dale City, Va., and junction Virginia Highway 642 and Interstate Highway 95 (Dale City Interchange), from Dale City over Virginia Highway 784 to junction Virginia Highway 642, thence over Virginia Highway 642 to junction Interstate Highway 95, and return over the same route, with service at the junction of Virginia Highway 642 and Interstate Highway 95 authorized for purpose of joinder only, in connection with Virginia State lines presently authorized regular route between Washington, D.C., and Richmond, Va., over Interstate Highway 95. **NOTE:** Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. or Richmond, Va.

THE

GAB

PHILOSOPHY

Whither is fled the visionary dream?
Where is it now, the glory and the dream?

William Wordsworth
Ode on Intimation of Immortality

The GAB Philosophy

The opening of the Far West is one of the most exciting and thrilling chapters in American history. Zebulon Montgomery Pike to Colorado in 1807; Sylvester Pattie, his son and 116 men through the Mexican territory on a six-year journey, starting in 1824; Nathaniel J. Wyeth and his twenty-one farmers and artisans to the Northwest in 1834; the Donner party of eighty-one men, women and children starting for California in 1846, and the Great Mormon Trek under Brigham Young in 1847 from Illinois to Utah.

The Pioneers in American history were those men and women who left the older settlements and struck out on their own across mountains, rivers, plains and deserts where they made a granery for millions of the vast Western plains; replaced the lonely cry of the coyote with the hum and pulse of cities. Because of the many dangers and problems, it couldn't be done alone, but by putting many shoulders to the wheel -- straining with all their might -- they gained the tops of the mountains. From these same mountains they brought water to the vast, parched desert.

As we cross the vastness of the great West today, perhaps in the comfort of a jet airliner, we wonder that they were brave enough to cross the plains.

Arizona and the great Southwest lay in an area labeled the "Great American Desert", as it appeared in school geographies for over half a century. Today, this "Great American Desert" is the largest irrigated area in the world and is one of the wealthiest agricultural and livestock raising sectors in America.

It was settled by people who shared a common visionary dream...by people helping people, realizing that it couldn't be done by one man alone. Together, they raised barns and later cities. Together, they made a reality of their visionary dreams.

In the intervening century and a half, the visionary dream has dimmed. Where is it now, the glory and the dream? What has happened to the magnificent pioneering spirit of sharing the dangers, the harvest, and the dream; of working together to conquer a new frontier?

Greater Arizona Boosters (GAB) Enterprises, Inc., was born from Mr. Arnold Burr's basic belief that the pioneer dreams persists; that this common visionary dream is yet shared by men and women who are eager to strike out with others who share their dream and are willing to put their shoulders to the wheel to reach the top. Arnold Burr keeps the pioneer spirit alive--the spirit of People Helping People. And that is the keynote to GAB...

PEOPLE HELPING PEOPLE!

Arnold Burr, and his associates at GAB, believe that a uniquely American inventive, creative pulse -- once strong -- has been weakened by pressure tactics of the "super-corporations", the inequities of Federal tax laws, and the outmoded dogma of corporation finance and governmental control of capitalization. The common effort of the Pioneers -- once strong, now feeble -- has atrophied. Between the Conestoga wagon and the Cadillac we have too often failed to see ourselves in our neighbors, and we are no longer eager to extend the helping hand. We have become nationally indolent and dependent on the super-corporations and the Federal government to subsidize our enterprise and inventiveness... to absorb the visionary dream. Too few shoulders are willing to strain with all their might to gain the top.

Mr. Burr, in his twenty-three years as a business consultant, watched many small firms go through the labor pains, blossom and show promise...and then die. Die because they had struck out on their own into a new frontier. The mountains were high and there were too few shoulders to strain against the wheel. He saw the small wage earner unable to put his hard-earned dollars to work where they could strengthen his future and security. He saw capital funds in many small companies dwindle and perish as many superb ideas, great inventions, fine small corporations and individuals crumble for the lack of willing shoulders and helping hands. From this knowledge, and with his firm belief in the persistence of the American pioneering spirit, he formed Greater Arizona Boosters. What he, and his associates today call the "Big G Team".

Over a decade ago he had organized A & L Business Service, Inc., to offer business guidance and assistance to new companies needing management services, as well as tax service for either a business or an individual.

In keeping with his personal philosophy, Arnold Burr went in search of a team of people who would unite under the banner of GAB; who were willing to put their shoulders to the wheel to reach the top. He talked to people from all walks of life; asking over and over what they would do if offered the opportunity to unite in a common effort to see a new company, a bright idea, or an energetic individual reach the top? Would they lend their assistance in management, marketing, manufacturing...above all, would they assist in spreading the seeds of the GAB philosophy? The response was most often a strong, positive yes.

Then, a young, black, ex-Marine and highly decorated combat veteran, cherished a dream of establishing a mail order gift business. He heard of GAB and brought his ideas to Arnold Burr. Today, hundreds of items, including the specialty articles of GAB, are available through the different catalogues, flyers and mailers circulated from GAB Gifts, Inc. The strong, black hands of the ex-Marine joined the hands of GAB in People Helping People.

At about this time a 53-year old employee of a vending machine company came to Arnold Burr. He had the opportunity to buy a vending machine business and put to work some of his ideas of advancement and enlargement, but he was afraid to break away from his job because of his advancing years. Could GAB help him?

With the advise and assistance of GAB the man bought the vending machine company and it soon grew and prospered. The 53-year young employee was now the head of his own progressive business. He was so imbued with the purpose and potential of GAB that he joined the team as a subsidiary. More strong hands to help People Helping People.

As GAB grew, so did its fame. Inventors, hearing of the helping hand, brought their ideas and models to Arnold Burr and were astounded at a new discovery! Here was an organization which would help the inventor make his dream a reality.. not take his patent and the fruits of his labors.

Ideas and inventions were researched and tested: a hot dog cooker; a golfing-aid called Time-Rite; a chemical-formula, non-lethal system combined with a powerful flashlight for self-protection and law enforcement; a new line of stuffed toys; and automobile safety seat for small children, approved by the National Safety Council.

Another subsidiary of GAB, Galaxie Industries, Inc., of California produced the new items. Not one, but dozens of helping hands reached out to give life to the new company, the invention, the individual with the visionary dream. Yet another subsidiary, GAB Sales, Inc., was formed to sell and distribute any and all products developed through GAB's assistance. Highly qualified salesmen, executives from major corporations with the knowledge to market the new items, travel nationwide presenting the many specialty items. Television and magazine sales presentations carry GAB items across the nation.

Over ten years ago Arnold Burr became fast friends with an air conditioning mechanic and sheet metal worker, who had plied his trade for over fifteen years. The mechanic's all-consuming interest in mineralogy, and past labors in that

field with acknowledged experts, had led him and two associates on prospecting trips throughout the Far West. He told Arnold Burr of some amazing finds. There were rich claims which the mechanic and his friends were unable to develop for lack of funds. How, he had wondered, could they get enough backing to work these claims themselves, without selling out to the super-corporations? Arnold Burr nurtured the dream of helping these visionary men to develop their claims. Now he was ready to establish markets and develop what may well be the largest holding of high grade, commercial mica in the world. Through GAB's many contacts in the mining industries it was learned that these deposits of exceptionally high grade "scrap" and "schist" mica, along with the rare earths imbedded in them, were worth many millions of dollars. Moreover, the were critical to production in the electronic, electric and space industries. Calling together his team of helping hands, they set to work to gather the necessary funds. The mechanic and his associates joined GAB, and in the summer of 1971 will see the birth of the first mill of Space Minerals, Incorporated. More strong hands joined the team of People Helping People.

As GAB grew and prospered, its advertising needs moved ahead in quantum steps. An ex-news-caster, announcer, writer and television director heard of GAB and brought to Arnold Burr his dream of managing an advertising agency. Could GAB help him? In 1970 a new advertising corporation, designed to handle the advertising needs of GAB Enterprises and its subsidiaries, joined the "Big G Team", and another pair of strong and willing hands joined others in People Helping People.

At about this time, six toy designers came to Arnold Burr with an impish, captivating toy called "Super-Snitch". Could Mr. Burr help them market their product? In 1970, the six creators of Super-Snitch, as a new toy manufacturing corporation, joined GAB for not only production of the super-imp,

but for assistance in most all phases of manufacturing and marketing of the new product. A half-dozen more strong hands became available to People Helping People.

Each new individual and organization which has joined the GAB team is instantly aware that the "Big G" banner is living and constant. As Arnold Burr expresses it:

"GAB Enterprises is dedicated to assisting ambitious people in reaching their dreams. Imagination, creativity, uniqueness, faith in his fellow man, positive thinking, and hard work are the tools used by GAB to insure a successful and prosperous future. GAB believes that with these tools, people can achieve anything if they really desire to achieve their goal."

And that is what GAB is all about....

PEOPLE HELPING PEOPLE!

Tel: (602) 263-9641

KAP WR 5/9/86: In the company of Tim Whitney of Murco Wall Products in Buckeye, a visit was made to the Big Strike Mica deposit in Yavapai Co. There has been no apparent activity since my previous visit in the 1970's. Mr. Whitney is interested in the property as a possible source of mica for Murco's wall board joint compound. Samples were taken from three old cuts of the deposit in the E2, Sec 36, T14N R9W.

KAP WR 6/6/86: Tim Whitney of Murco Wall Products brought in the application for a State prospecting permit on the part of the Big Strike Mica deposit, Yavapai County, for which he plans to file. Assisted him in determining what portions of Sec. 36, T14N R9W he wanted to apply for. He hopes to be able to develop a part of the deposit to supply a portion of their mica needs. It appears that previous promoters of the property were not aware that it was State trust surface and mineral lands. The permit application is in the name of Murco Wall Products, 300 NE 21st Street, Ft. Worth, Texas 76016 by O.J. "Bud" Murphy.

KAP WR 6/12/87: In a field interview with Tim Whitney, Murco Wall Products, he reported they are continuing with the testing and evaluation of the mica at their portion of the Big Strike Mica Mine, Eureka District, Yavapai County. They have joint ventured with Pluess Staufer, a Lucerne Valley, California calcium carbonate producer who has laboratory facilities for extensive testing.

KAP WR 8/14/87: Hans J. Achermann, Geologist, Pluess Stouffer California, Inc. P O Box 825, Lucerne Valley, California 92356 requested information on mineral rights and geology in the Bagdad area of Yavapai County. He is evaluating the portion of the Big Strike Mica (file deposit on which Murco Wall Products has a state prospecting permit. According to Tim Whitney, General Manager, Murco Wall Products, Buckeye Arizona, they hope to develop the mica deposit in a joint venture.

KAP WR 9/4/87: Tim Whitney, Murco Wall Products, reported they have gotten a bill from Pluess Staufer for consulting work done on the portion of the Big Strike Mica deposit (file Yavapai County they have under State prospecting permit. However, he said he doesn't have any data. Pluess Staufer was supposed to be joint venturing on the deposit with them (Murco). He went on to say that Bud Murphy, the company's owner has hired the University of North Carolina to do beneficiation and grinding tests on the Big Strike material.

Big Strike Mica Mine
~~SPACE MINERALS, INC.~~

Mine visit - Big Strike Mica claims. The Big Strike Mica claims were owned by the defunct Space Minerals Division of G.A.B. The property consists of a number of claims situated adjacent to and to the southeast of Arizona Highway 97 (at MP 165) in Sec. 36, T14N R9W. The claims are on mica schist and micaceous pegmatite dikes in biotite granite. None of the mica observed in the cuts made on the property would qualify for anything but scrap mica. All the schist and pegmatite observed had large quantities of quartz and feldspar mixed with the mica. The mica schist nearest the highway strikes 35°E and dips 74°W. KP Report of 1/29/73

Proceeded to the abandoned Big Strike mica claims where a sampling program was outlined for Mr. Groves of Plastic Production Machine & Tool Co. If the samples indicate the mica schist to be useable as strength enhancing filler in plastics, Mr. Groves will relocate the claims. KAP WR 5/26/76

KP/WR 1/26/79 - Dr. Puyana reported he owns two mica properties, one near Yuma and one on what was a portion of the old Space Age mica property in Yavapai Co. 2/8/79 a.p.

KAP WR 4/24/80: Roger Young reported that he needs a muscovite schist deposit which will contain at least 50 percent fine grained muscovite. It was suggested that he look at the Big Strike Mica Property, Eureka District, Yavapai County.

KAP WR 1/8/82: Bob Root, Box 16156, Los Cruces, New Mexico 88004, phone 505-524-1649, reported that he with J. M. Huber made a very brief investigation of G.A.B. Enterprises, Space Age Mica deposit, Eureka (Bagdad) District, Yavapai County. He said the occurrence has the highest yield of any mica schist he has investigated. The yield of very limited test yield over 50% mica.

KAP WR 1/29/82: Duncan Ogden and Roger Young reported they visited the Big Strike mica deposit, Eureka District, Yavapai County. In their opinion, the granite has intruded and assimilated portions of the older mica schist. Therefore, a large homogenous body of schist may not be available. To be of commercial interest, a mica schist deposit would need to be 100-200 feet wide and 2,000 feet long. The area of the Big Strike occurrence has potential for the discovery of such a deposit.

To avoid payment of penalty and interest this payment must be in the OFFICE OF the State Land Department ON or BEFORE the DUE DATE. Date of POSTAL STAMP will not be accepted as time of payment.

January 29, 1979

Mr. M. H. McKellar
John K. Bice and Company
1319 Boyd Street
Los Angeles, California 90033

Dear Mr. McKellar:

Enclosed is a copy of a letter sent to a Dr. Puyana who reported he owns or is part owner of two mica occurrences in Arizona. In response to his request for suggestions as to who might purchase mica, we suggested he contact your firm. This we have done as a possible service to him, your firm and toward potential mineral development in Arizona.

However, our Department is not familiar with either of Dr. Puyana's properties or their potential to produce mica. We plan to visit both of his properties (a free service of State of Arizona through our Department) and we will make suggestions as to how he might proceed with development (if applicable) at that time. We would also be happy to discuss our suggestions with your firm.

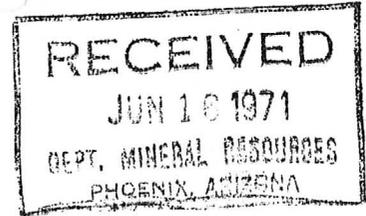

The primary statutory duty of the Arizona Department of Mineral Resources is to aid in the development of the State's mineral resources. If at any time we might be of service to you or your firm, please do not hesitate to contact us.

Sincerely,

Ken A. Phillips
Mineral Resources Engineer

SPACE MINERALS
BIG BIG STRIKE MICA CLAIMS

Estimate of Reserves, June 1971

Reserves of both the pegmatite schists and the mica schists are substantial. There is no apparent geological reason to believe that the present exposures do not carry down to considerable depth.

From the present information the following estimate of the amount of native materials available for treatment has been made:

Mica Schists	20 Million Tons
Pegmatite Schists	20 Million Tons
Unworkable Materials	20 Million Tons
Average Mining Depth	110 feet
Surface Area	172 acres

This is a preliminary estimate of reserves and does not represent a detailed analysis based on a drilling program and detailed geologic mapping. It is not intended to represent the total amount of material available, only what is safe to predict from the surface indications.

This estimate represents sufficient tonnage for operations for 25 years at a rate of 4000 tons/day.

PROGRESS REPORT TO THE GAB TEAM OF FINE PEOPLE

As we come to the close of the second quarter of 1971, we enter into the greatest adventure in this years operations. I say our greatest adventure because of the up-coming events, such as--:

The Transworld Navy Pier Housewares & Variety Exhibit, which is the largest show of its kind in America. There will be over sixty thousand buyers in attendance at this show. On display in booth 1500 will be the product of GAB, and the feature product will be our Mini-Chef. Since it has been a very trying and grueling hassle for us to receive UL clearance on this product, it will be a great pleasure to finally put it into the hands of the buyers who have been anxiously awaiting its showing. Purchase orders are awaiting; the presses are ready to roll, and the GAB Sales team is ready. With the majority of chain stores buying being done at the July and January shows, we are looking forward to spectacular sales. The entire staff here at GAB is as anxious as all GAB participants to get this into the appliance departments of all the chains throughout the country.

Another great and exciting product which will be on display is the sensational new golf aid, the "TIME-RITE". This tremendous little invention has proved itself not only throughout the United States but now it has become a wanted item by almost a dozen countries around the world. It has been the "TIME-RITE" that has put GAB into the exporting business which is proving to be a very lucrative field.

Also to be displayed are the games for the Christmas market which GAB has nurtured from their inception to a reality for the people who have invented them, but because of the lack of funds and marketing know how, etc., were never able to get them on the market. However, because of GAB's Philosophy of "people helping people" we have put all shoulders to the wheel to get them to their present state. Since the toy industry is so competitive, and very challenging, we are anxious to see, feel and hear the response to these new and exciting ideas.

GAB, being very diversified, has developed yet another new and badly needed product for the national market...a childs safety seat for automobiles. With the number of automobile accident deaths of small children rising because of the lack of safety, this seat has been designed and built to exceed the

requirements of the National Safety Council, and has met with their approval. Due to the fact that there are no such seats on the market, we feel sure that this will be another great vital item to be brought to the American public.

These are a few of the reasons we are so hopeful about the months which lie ahead. I say a few of the reasons because there are more. For instance, the continued success of our Security Division's items on the market. The now famous "Chemlite" is another idea brought to a reality by GAB, and accepted by numerous national security companies. The sales of the "Chemlite", which is a non-lethal chemical flashlight, are gaining momentum never dreamed of. Because of the outstanding success of Chemlite, other much needed personal and industrial security items have been brought to GAB for distribution. Such things as a bullet proof vest to protect our police officers during riots, and other riot control weapons. This 30-billion dollar a year business is just beginning to blossom and brighten the office of GAB, and will continue to grow as GAB grows.

Then last (but by no means least) comes the greatest of all GAB programs presently under development. The opening of Space Minerals mica processing mill. This heralds the advent of a new and major mineral industry here in Arizona. Long-term programs of Space Minerals will provide vital sources of rare strategy minerals; employment of many people, to include maximum use of our disabled veterans; earnings for a broad spectrum of Arizona citizens and GAB participants; millions of dollars to the State Treasurer in taxes, and realization of a dream held by the originators of Space Minerals, Incorporated. While mica is very valuable and the by-products are also of great value, our most important product is people. Space Minerals will provide a means of economic participation in the development of Arizona's natural and human resources for decades to come. Participation in Space Minerals is now available to the GAB team and its friends, as further funds are being gathered at this time.

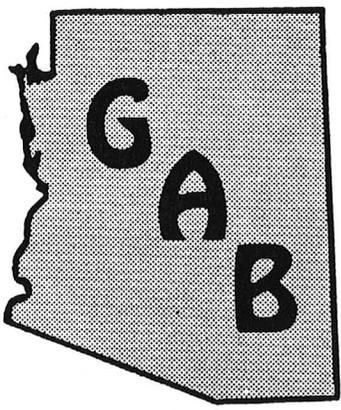

In light of all the aforementioned information, I feel that all participants in GAB will find the months ahead to be the most exciting and rewarding ever.

Respectfully yours,

*Put in
space mineral file*

Mineral Resource Department
J.H. Jett-Director
Mineral Building-Fairground
Phoenix, Arizona

Dear Mr. Jett :

The subject of this letter is people.

There are many products produced by Greater Arizona Boosters, (GAB), and its subsidiaries, but the most important product (and by-product) is people who take an active part in development of Arizona's natural and human resources.

Ours is a living philosophy, based on the inherent advantages of free enterprise and encompassed by the concept of people helping people. Its viability is evidenced by the newly created firms united under the GAB banner, and the people who make these firms grow and prosper.

We firmly believe and dedicate ourselves to broadcasting the seeds of the GAB philosophy throughout Arizona and eventually throughout the nation. From these first seeds we will grow a mighty orchard of people helping people.

Most sincerely yours,

Arnold Burr

SPACE MINERALS, INC. ESTIMATE OF TWELVE MONTHS OF OPERATION OF PHASE I OF MICA MINING

This is a report to show the profits obtained on our first phase of operation of producing 40 tons of finished product per hour on a five day week over a twelve month period.

Total Sales of the 12 months operation.	\$6,572,800.00
Complete cost of mining production.	<u>\$2,496,000.00</u>
Gross profit for mining operation.	\$4,076,800.00
Complete overhead cost including officers salaries, offices, marketing cost.	\$ 328,640.00
Arizona state lease and rental of state property will require lease payment on mining operation will be.	<u>\$ 328,640.00</u>
Net profit before federal and state taxes.	\$3,419,520.00
Less Federal and State income taxes.	<u>\$1,076,636.80</u>
Net profit after all Federal and State income taxes.	\$2,342,883.20
Less borrowed monies per year.	<u>\$ 250,000.00</u>
Net to Space Minerals, Inc.	<u>\$2,092,883.20</u>

This operation is based on an eight hour working day and 40 hours per week only. Our engineers have recommended that we operate on a three work shift day as this would bring the cost of production down. Also, the total sales are based on the market price of the lowest finished product that we are producing and doesn't include the high quality of mica that will be produced during this first phase operation. We have five committed buyers that will purchase all the mica schist or scrap mica that we can produce. These cost figures shown are in excess of what our engineers have projected, in order to allow for any unforeseen cost. We have compiled this report for Space Minerals, Inc. to show why we are paying the return on the monies borrowed to build the first phase operation.

Thomas J. Bulger

MODERN APPLICATIONS FOR MICA

Vacuum tubes	Lightweight refractory & acoustical items
Capacitors	High temperature gaskets
Micro-circuit molded plastics	Ornamental stucco and wallpaper
Electrical insulators	Greases and paints
Fire-proof paints	Soil conditioner & mulch in agriculture
Non-metallic non-conducting tools	Metallic paints
Fireproof insulation against heat, cold, sound	Lubricants for high temperature applications
Refrigerator, oven, furnace thermal linings	Rubber industry in molding tires and other products
Thermal jugs	Washing machine and refrigerator primers
Life preservers	Underwater paints
Shells and bombs	Traffic paints
Imitation snow for motion pictures	Heat resistant paints
Textile coatings for duck, tenting and awnings to increase water resistance	Drilling muds for oil wells
fire resistance and flexibility	Tar roofing compounds
Bituminous coatings	Insulated cables
Water tank coatings	Filter aid materials
Welding rod coatings	Oiled silk coatings
Glass panels for electrical use.	

QUARTS APPLICATIONS

Laboratory tools	Optical flats
Gage blocks	Precision balance weights
Quartz tubins & other specialized equip.	Ceramics
High quality lenses	Lens components
Wedges	Plates
Prisms	Accurate frequency control in electronics

FELDSPAR APPLICATIONS

Fine bone China	Soaps
Welding rod coating	Glass
Pottery	Enamel
Artificial teeth	Poultry grit
Cleansers	Sweeping compounds
Abrasives	Miscellaneous fillers
Fire-brick cement	Concrete aggregate
Stucco	Roofing granules
Extinguisher for magnesium fires

State Land Commissioner

P. P. No. 08-93836

Date July 23, 1986

STATE LAND DEPARTMENT
STATE OF ARIZONA
PROSPECTING PERMIT

The STATE OF ARIZONA grants to MURCO WALL PRODUCTS, INCORPORATED

, the exclusive right, for a
period of one (1) year from date, subject to renewals as hereinafter set forth, but
in no event beyond the 22nd day of July,

19 91, to prospect for minerals on the State land hereinafter described upon
the following expressed conditions which are a part of the permit.

1. The permittee shall have those surface rights necessary for the prospec-
ting and exploration for mineral, but may remove from the land only that amount of
mineral required for sampling, assay and metallurgical testing purposes.

2. The permittee shall have the right of ingress to and egress from the land
covered by the permit but only along routes first approved by the State Land Com-
missioner.

3. The permittee shall be liable to and shall compensate the owner and lessee
of the surface of the State land covered by this permit, or across which the per-
mittee exercises the right of ingress and egress, for any loss to such owner and
lessee from damage or destruction caused by the permittee, his or its agents or
employees, to grasses, forage, crops or improvements upon such State land.

4. This permit shall terminate automatically, as of the end of any annual
period from and after the date of issuance thereof unless during such annual period
the permittee shall have expended in exploration for valuable mineral deposits on
the State land covered by this permit the prescribed amount per acre, file an appli-
cation for renewal and submit proof of the amount expended on exploration. The
amount to be expended during each of the first two annual periods in which this
permit may be in effect shall be not less than ten dollars for each acre of land
covered by this permit at the commencement of such annual period, and the amount
to be expended during each of the last three annual periods in which this permit
may be in effect shall be not less than twenty dollars for each acre covered by this
permit at the commencement of such annual period.

5. Prior to the termination of any annual period, the permittee may file a
release with the State Land Department, releasing acreage covered by this permit
provided that the acreage released be contained within one or more rectangular
subdivisions of twenty acres more or less, or lots, according to the lines of the
public survey.

6. Upon any partial or total relinquishment, or the cancellation or expira-
tion of the permit, other than by issuance of mineral lease, the permittee shall fill
any holes, ditches, or other excavations as may be required by the State Land
Commissioner and so far as reasonably possible, restore the surface to its former
conditions.

7. The permittee may, prior to expiration of the annual period for which the permit was issued, or prior to the expiration period for which this permit was renewed, file with the State Land Department an application for renewal for the ensuing annual period. This permit shall not be renewed for more than four successive annual periods following expiration of the first annual period.

8. No rental shall be payable for the first annual period for which the permit may be renewed. The rental for each of the three subsequent annual periods following the first annual period for which a permit may be renewed shall be one dollar for each acre of State land for which the application for renewal is filed.

9. The permittee shall file an affidavit of expenditure of the required amount in exploration during the current annual period, together with proof in support of such expenditure.

10. Following discovery of a valuable mineral deposit on the State land covered by this permit within a rectangular subdivision of twenty acres, more or less, or lot, of the public land survey, the permittee may apply to the State Land Commissioner for a mineral lease upon the State land within such rectangular subdivision, or lot.

11. This permit is subject to existing laws and rules and regulations and any laws or rules and regulations hereinafter enacted, or adopted, and in no event shall the State be liable for damages or otherwise under the provisions hereof.

12. The permittee shall not assign or sub-let this prospecting permit, or any right or rights thereunder, without first obtaining the written consent of the State Land Commissioner thereto.

In order to minimize or prevent surface or underground waste and pollution and promote maximum conservation, permittee shall seal or separate oil, gas, helium, water, mineral or other natural resource strata in order to prevent their contents from passing into another stratum.

The Lessee agrees to indemnify, hold and save Lessor harmless against all loss, damage, liability, expense, costs and charges incident to or resulting in any way from any injuries to person or damage to property cause by or resulting from the use, condition or occupation of the land.

The Permittee shall not, for exploration purposes, enter upon that part of the permitted area encompassed by right-of-way and permits granted to the Arizona State Highway Department without the express written permission of the State Highway Engineer and not then until the State Land Commissioner has in writing approved such entry.

The Permittee agrees that any mineral lease of a claim issued as a result of exploratory activity under this permit shall contain an additional and special condition denying the lessee entry to the area encompassed by those rights-of-way and permits mentioned next above for the purposes of extracting and shipping mineral unless and until the State Highway Engineer has given express written permission and not then until the State Land Commissioner has in writing approved such entry.

If at any time during the duration of this Permit the whole or any part of the Permitted premises shall be taken for any quasi-public or public purpose by any person, private or public corporation, or any governmental agency having authority to exercise the power of eminent domain or condemnation proceedings pursuant to any law, general, special or otherwise, this Permit shall expire on the date when the Permitted property shall be so taken or acquired and the Permittee shall have no compensable right or interest in the real property being condemned and shall have no compensable right or interest in severance damages which may accrue to the remaining Permitted property not acquired by condemnation proceedings. Net rent to be paid by the tenant shall be apportioned and paid to the date of such taking.

The State shall be entitled to and shall receive any and all awards, including severance damage to remaining state lands, that may be made for any eminent domain or condemnation proceedings concerning the land which is the subject of this Permit, except that Permittee shall have the right to receive any and all awards or payments made for any buildings or other improvements lawfully placed on the subject property by the Permittee with the approval of the Land Department.

This permit is issued for such leasable minerals now owned by the State of Arizona and in regard to which there has been no reservation by a predecessor in title to the State of Arizona.

Federal records may or may not reflect mineral interest claims that pre-date the state's claim to some or all of these lands; the state does not warrant that it owns the minerals sought to be prospected under this permit.

This permit issued subject to all the rights of the owner of the non-mineral land estate.

Provided however, in regard in those parcels of state lands sold under the provisions of ARS 37-231, providing for a reservation of minerals to the state, there shall be no entry upon such lands by an Arizona State Land Department lessee or permittee without express written approval of the Arizona State Land Commissioner following compliance with Arizona State Land Department Rule #12-5-707D by such lessee or permittee.

"Before significant earth movement may commence, the lessee or permittee hereof shall satisfy the Arizona State Land Department in writing that no significant cultural, historical, antiquity or archaeological values will be destroyed, and, in the event such values will be destroyed, that proper mitigation measures have been agreed upon between said lessee or permittee and the Arizona State Land Department, and further said lessee or permittee shall report all of such values as they are later discovered after such approval is given initially."

Notice of State authority to cancel this contract:

- A. The State may cancel any contract, without penalty or further obligation, made after September 4, 1978 by the State or any of its departments or agencies if any person significantly involved in initiating, negotiating, securing, drafting or creating the contract on behalf of the State or any of its departments or agencies is, at any time while the contract or any extension of the contract is in effect, an employee of any other party to the contract in any capacity or a consultant to any other party of the contract with respect to the subject matter of the contract.
- B. The cancellation shall be effective when written notice from the Governor is received by all other parties to the contract unless the notice specifies a later time.

Native Plant Law:

If the removal of plants protected under the Arizona native plant law is necessary to enjoy the privilege of this document, the permittee hereunder must previously acquire the written permission of the Arizona State Land Department and Arizona Commission of Agriculture and Horticulture to remove those plants.

ADDITIONAL CONDITION

PRIOR TO THE BEGINNING OF ANY EXPLORATION, A PLAN OF OPERATIONS AND RESTORATION MUST BE FILED WITH THE STATE LAND DEPARTMENT AND APPROVED BY THE STATE LAND COMMISSIONER OR HIS DEPUTY.

SECTION, TOWNSHIP AND RANGE MUST BE INCLUDED IN THE LEGAL DESCRIPTION
RESTORATION AND DAMAGE BOND

KNOW ALL MEN BY THESE PRESENTS:

Bond No. 30014142

That we, Murco Wall Products, Inc.,
AS Principal, and Fidelity and Deposit Company of Maryland,
a corporation organized under the laws of the State of Maryland, with its
principal office in the City of Dallas, Texas 75231, and duly authorized to trans-
act surety business in the State of Arizona, as Surety, are held and firmly bound unto the
State of Arizona for the use and benefit (1) of the State of Arizona, and (2) of any lessee,
under a lease issued or to be issued by the State of Arizona, covering the use of the sur-
face of State Land hereinafter described, as Obligee, in the full penal sum of \$1,000
Dollars, lawful money of the United States, for the payment of which, well and truly to be
made, we bind ourselves, our heirs, executors, administrators, successors and assigns,
jointly and severally, firmly by these presents.

Signed, sealed and dated this 23rd day of July, 19 86

WHEREAS, the above bounden Principal is about to obtain from the State of Arizona a
(XXXXXX) (lease) Number 08-93836, for a term of One years, covering the
State Land described as follows:

Sec 36 Township 14 N Range 9.0W - 300 acres

together with right of ingress and egress over State land described as follows:

existing prospect road beginning at Mi Post 165, Hwy 97

AND

WHEREAS, the Principal is required by law to file and maintain in force with the State
Land Commissioner a bond conditioned as hereinafter set forth.

NOW, THEREFORE, it is the condition and obligation of this bond that if principal in
conducting any mining exploration, development or operation fails to comply with the
terms of the lease or permit, or otherwise by the end of the lease or permit fails to pro-
vide for the safety and protection of human life and livestock by the adequate fencing
and/or other closing or filling of all shafts, prospect holes, adits, tunnels and other dan-
gerous mine workings, insofar as it is reasonable, as determined by the Commissioner,
or fails to restore the surface of the subject property as nearly as possible to its con-
dition immediately prior to the issuance of this lease or permit then the above bounden
surety shall promptly pay to the State of Arizona and lessee of the surface of State Land
covered by the aforesaid lease or permit or across which the principal exercises the
right of ingress or egress, for any loss to the State of Arizona and such lessee for dam-
age or destruction caused by the principal, his agents or employees, to land surface,
grasses, forage, crops and improvements upon such State Lands resulting)from princi-
pal's use and occupancy of the land under the lease or permit.

PROVIDED, regardless of the number of years this bond shall continue or be continued
in force and of the number of premiums that shall be payable or paid, the Surety shall
not be liable hereunder for a larger total amount, in the aggregate, than the penal sum of
this bond.

PROVIDED FURTHER, the Surety named herein may cancel this bond and be relieved of
any further liability hereunder by giving thirty (30) days notice, in writing, of its desire
to do so to the Commissioner of the Land Department, of the State of Arizona, Phoenix,
Arizona.

Enterprises, Inc.

Looking Back . . . With An Eye To The Future

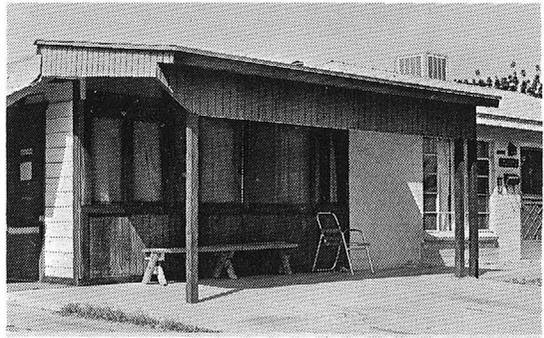

In 1968, Arnold Burr invisioned a multiple business corporation. He planted the seed which germinated, developed and gave birth to what is today "Greater Arizona Boosters," or the "Big G".

As time moved on, the "Big G" expanded and grew, but the concept and conviction remained as originally entended:

"GAB Enterprises, Inc. is dedicated to assist ambitious people in reaching their dreams. Imagination, creativity, uniqueness, faith in your fellow man, positive thinking, and hard work are the tools used by GAB to insure a successful and prosperous future. GAB believes that with these tools, people can achieve anything if they really desire to achieve their goal."

At the same time it was Mr. Burr's desire to assist the small investor, or average individual, in being able to invest small amounts of money in safe and secure businesses or projects. He has assisted many people to realize a handsome return, and with a very small risk.

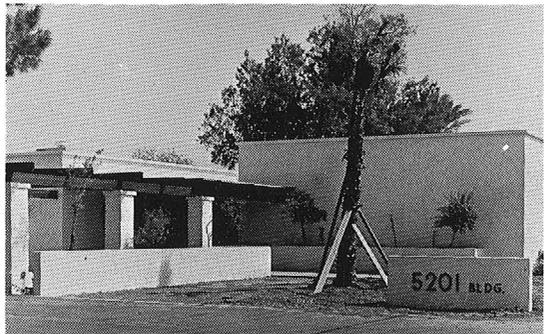

Starting in a converted carport, the small office of the "Big G" soon outgrew itself and finally expanded to the office space and area it commands today.

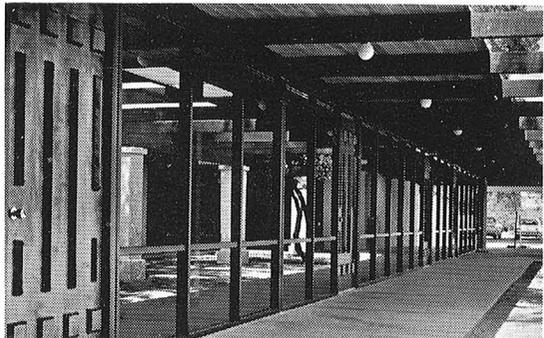

First Home of GAB

New Complex

Outside New Office

The Period of Transition

During the transition period, the "Big G" soon became the parent corporation of several subsidiaries.

The first to be formed under the "Big G" was A & L Business Service, Inc., designed to assist small businesses and independent individuals. As time passed, along came Sunrise Vending, Inc., GAB Sales, Inc., Galaxie Industries, Inc., GAB Gifts, Inc., Space Minerals, Inc., Viking Advertising Agency, and Art-Star Inc. As you no doubt have noted by this time, GAB is completely diversified. By so doing GAB not only is able to assist each subsidiary, but each single business is able to be of help to each other. On top of this "in family" business, each is designed to be an independent business to the outside business world.

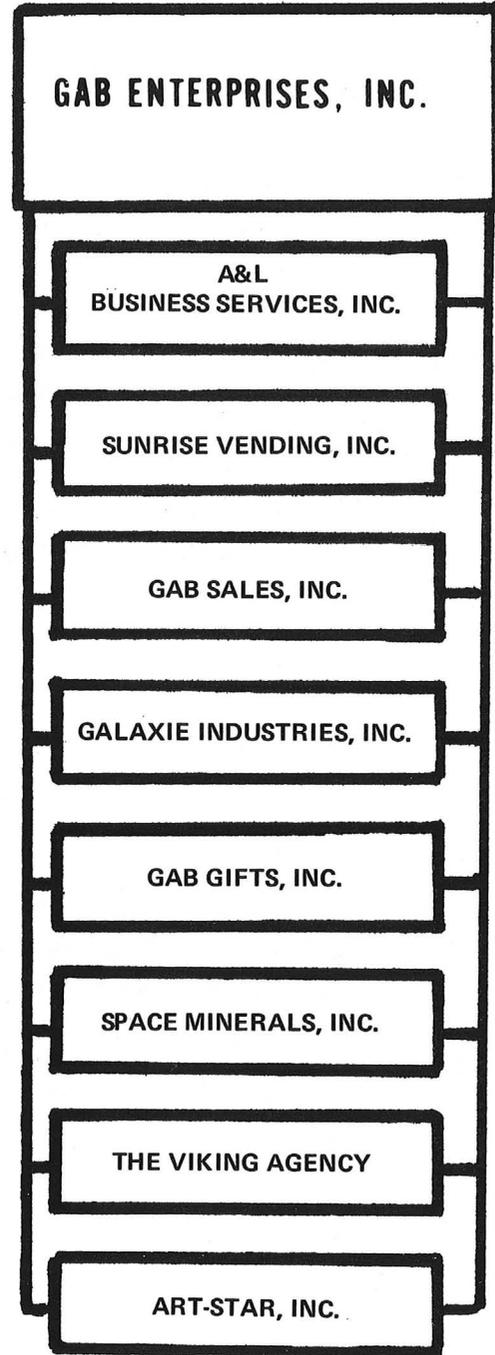

BENEFITS TO OUR CUSTOMERS

Being diversified, the "Big G" is able to be of immense assistance to many of its customers.

For instance, a small and newly started manufacturer may approach the "Big G" and find a complete bookkeeping and tax adviser; a built in sales force to distribute and sell its product; a mail order division to even further assist in getting its products to the consumer; also its advertising, in all areas, can be handled through the "Big G".

In many instances, one stop at the "Big G" will solve several, if not all, problems of a business not yet large enough to support all phases needed for survival and success.

This complete scope of assistance is naturally a benefit to our customers.

A & L Business Services, Inc.

A & L Business Services, Inc. offers business guidelines to those needing, as well as complete tax service for either business or individuals.

A & L also serves as the comptroller and business advisor to the subsidiaries under GAB.

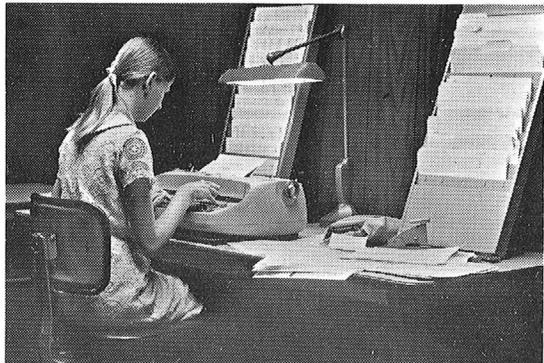

A & L Business Services, Inc. is headed by Thomas J. Bulger, who was born in Erie, Pennsylvania in 1938.

Tom saw duty with the United States Air Force, serving as administrative supervisor in Japan and the Phillipines.

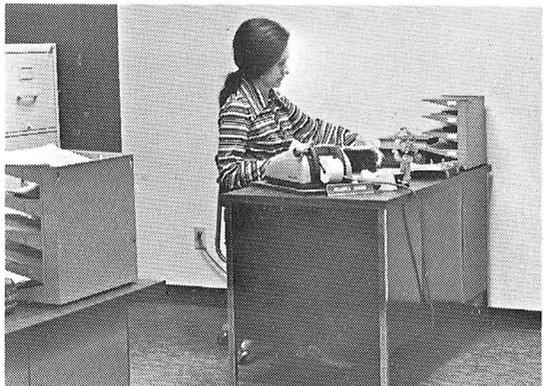

Following his discharge, Tom moved to Arizona in 1965 when he accepted a position as an accountant with the Sperry-Rand Flight Systems in Phoenix. He joined A & L Business Services, Inc. in 1970.

OFFICE PRODUCTION

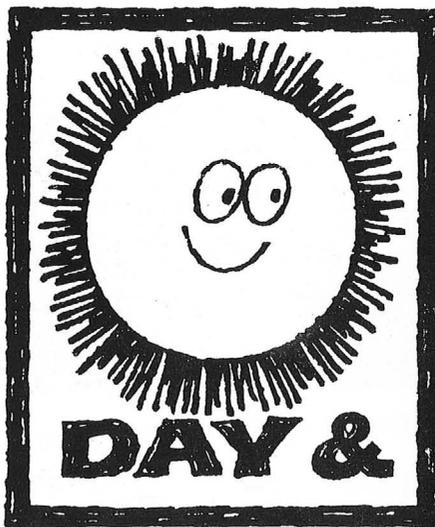

Sunrise Vending, Inc.

Sunrise Vending, Inc. is headed by Albert Waker, who has been in the vending business for over twenty years. Al was born in Canada, moved to the United States, served in the U.S. Army and moved to Phoenix, in 1970.

Mr. Waker started his Sunrise Vending business as a single proprietorship, but found he needed some assistance in certain areas of the business. He approached the "Big G" and joined the GAB family in 1971.

ALBERT WAKER

Gab Sales, Inc.

GAB Sales, Inc., is a complete sales force designed to sell and distribute any and all products.

Overseeing the entire sales force is H. I. "Irv" Bossert who was born in Wilkes-Barre, Pennsylvania. Following a tour of duty with the United States Coast Guard, he entered the sales field in 1959 with the Child's World and progressed to Divisional Sales Manager. Irv later accepted a position with General Foods, covering Southwestern United States, and soon was honored as their top salesman nationwide. He joined GAB Enterprises, Inc. in 1970.

Ray Blecha, General Manager, and his staff travel Arizona, New Mexico, El Paso, and Las Vegas representing Sani-Serv and Manley products.

Ray was born and raised in Chicago, Illinois. His background includes National Sales Trainer and Promotion Manager for the Fine Arts Sterling Silver Company. Ray was Public Relations and Field Supervisor for the Institutional Food Service Division of General Foods. Before joining GAB Sales Inc. in 1971 he was with Manley Food Machinery and Concession Sales and Equipment.

The National Sales Manager, Alan Sweetow and his staff travel nation-wide presenting the many speciality items carried by GAB.

Alan was born in Chicago, Illinois. Following college he opened a chain of floor covering stores. In eleven years Al expanded his chain to nine stores covering two states. Al accepted his position with GAB Sales, Inc. in 1971 bringing with him extensive sales and marketing abilities.

Galaxie Industries, Inc.

Headed by Hans O. Wibben, Galaxie Industries, Inc. is located in Santa Fe Springs, California. This corporation was formed for the purpose of supervising the manufacturing of all products handled by GAB Enterprises. Galaxie Industries, Inc. joined the "Big G" in 1971

Gab Gifts, Inc.

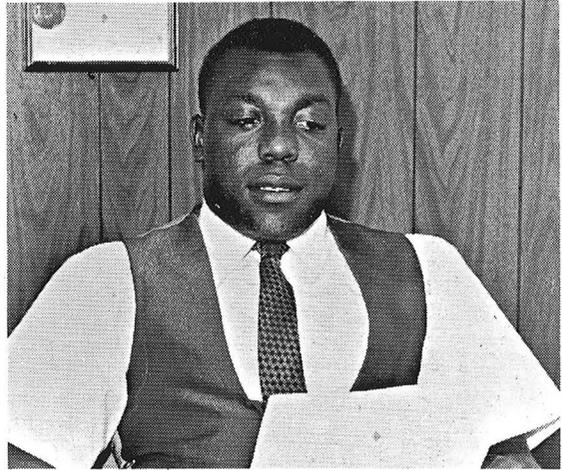

GAB Gifts, Inc. is the mail order division of GAB Enterprises.

Hundreds of items, including the specialty articles of GAB are available through the different catalogues, flyers and mailers circulated periodically each season.

GAB Gifts, Inc. is headed by John Easter, who was born and raised in Hope, Arkansas.

John joined GAB Enterprises, Inc. in 1970 following seven years in the United States Marines.

Although quite modest about his service record, John was awarded several medals for heroism on the VietNam battlefields.

Space Minerals, Inc.

Space Minerals, Inc., was formed to assist people holding claims in various mineral deposits within the state of Arizona. Presently this corporation holds mineral deposits of mica valued at \$5,325,048,000.00. These mica holdings have been assayed, engineered, surveyed and the valuation placed on these holdings is the market wholesale price from the mill.

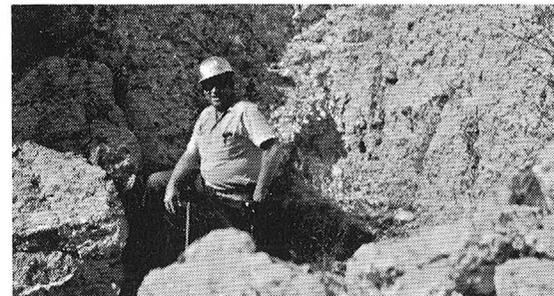

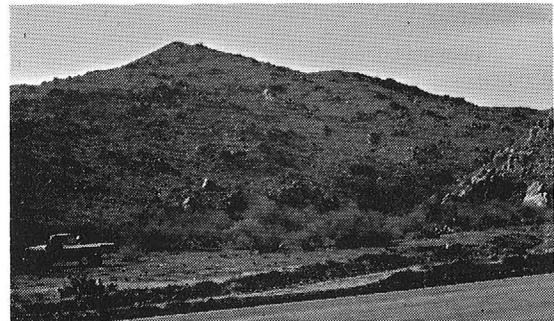

Space Minerals, Inc. is headed by Ed Lowrey, who was born in Holiston, Mississippi. He has been involved in metal work and prospecting successfully for over twenty years. Ed is familiar with most metals known to Arizona and has worked in most of the mines.

Through the years he has worked with the late Dr. Green of the School of Mines in Sonora, Mexico and with Dr. McNaulty, former head geologist with the Dow Chemical Company and presently heading an engineering firm and school in El Paso, Texas.

The area above is situated in Yavapai County, Arizona, near State Highway 97, nine miles from the junction of Highway 93 and 97. A surface geologic map of Yavapai County is available at Space Minerals, Inc.

ED LOWREY

The Viking Agency

The Viking Advertising Agency was designed to handle the advertising needs of GAB Enterprises and its subsidiaries.

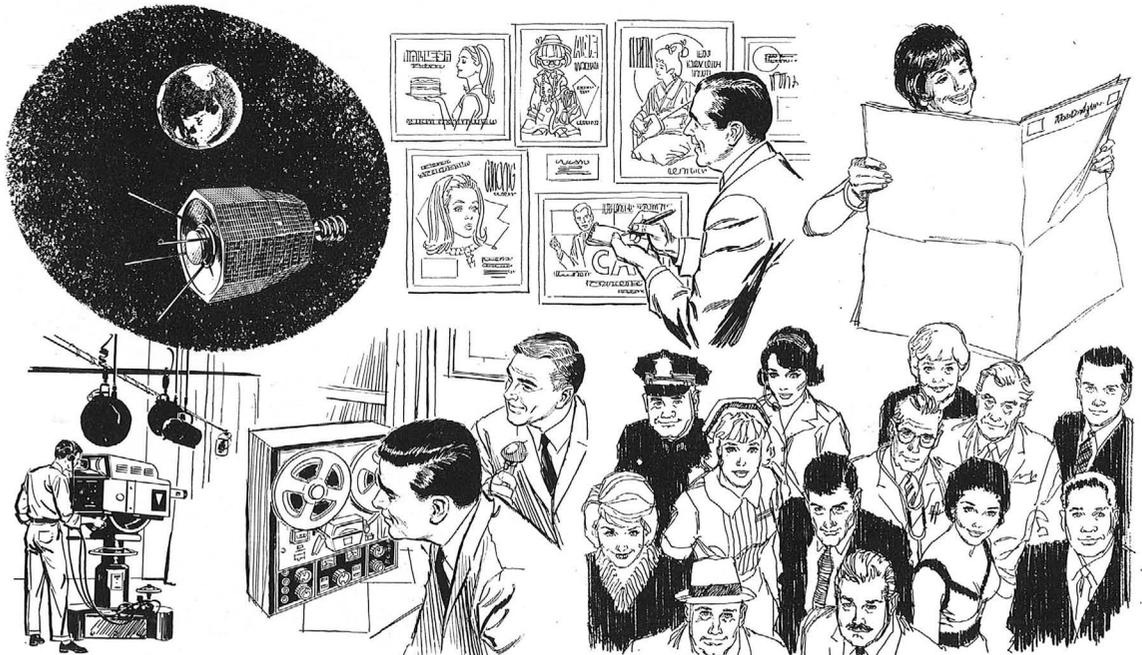

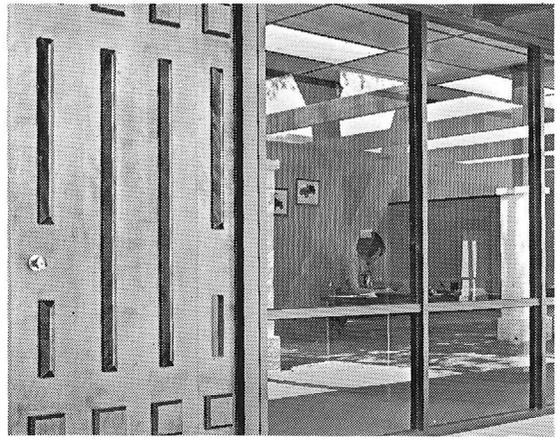

Whether it be local, regional or nationwide, Viking will prepare and place the advertising in the areas needed to assist the sales forces. Brochures, catalogues, flyers, and mailers are handled for GAB Gifts.

The Viking Agency is headed by Don Knutson, who was born and raised in La Crosse, Wisconsin. Don entered the field of broadcasting in 1949 as an announcer. He also has had the duties of newscaster, writer, television director and sales.

He joined GAB Enterprises in 1970.
