Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

BLUE CRYSTAL CLAIMS

PINAL COUNTY

Study of a report, Gerald A. Russell, Consultant, 1950 & 1951, and Travis Lane, supplemented by many sample results submitted by Roy Waughtel.

Reserves are calculated at 20,000 tons valued at \$27 per ton, mostly in lenses in a NW trending vein. Waughtel recently opened the adit to the drifts and plans to open these eventually. He found a strong vein, but as yet cannot evaluate it, although he said the vein material looked good to fair. LAS 6-23-64

STATE OF ARIZONA FIELD ENGINEERS REPORT

The Blue Crystal claim adjoins the Woodpecker claims on the east. Some good ore was encountered in a 750 foot shaft. The vein parallels the Woodpecker veins and carries copper and zinc ore with minor lead-silver values. The vein dips west and trends NW-SE.
