Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

SARATOGA MINES LEASES "BUZZWORM" MINING CLAIMS TO AMOCO MINERALS

GOLDEN--Saratoga Mines, Inc., announced today the signing of a lease agreement with Amoco Minerals Company, a subsidiary of Standard Oil Company (Indiana). The lease covers Saratoga's "Buzzworm" mining claims in Mohave County, Arizona.

As long as Amoco elects to maintain the lease, Amoco will be obligated to pay certain cash royalties to Saratoga and to perform considerable exploration work on the 64-claim group during the next five years.

Saratoga Mines, Inc., geologists discovered gold and silver mineralization on these claims in 1983. The property is near Bullhead City, Arizona, between two, currently producing gold mines, the "Frisco" and the "Tyro".

Saratoga Mines, Inc., completed a public offering in May, 1982, and is listed on NASDAQ, symbol (SARA). In 1983, the firm began gold production at its leaching operation in Central City, Colorado.
