ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

15 December 1980

MEMORANDUM FOR THE RECORD.

Calcite claim (CaCO_3), about 5 miles SW of Wickenburg, Az.
Vulture Mountains.

The undersigned, accompanied by August Gangola, 612 Clarkway Dr., Las Vegas, Nev., and J. David Campbell, Box 1297, Wickenburg, Az. 85358, visited the "Calcite" property on December 6, 1980. It is about 5 miles SW of Wickenburg, in the Vulture mountains, and near the old 'Big Spar mine.' Is in the $W\frac{1}{2}$ of Sec. 3, T-6-N, R-5-W, SR&G B&M. Is 1 lode mining claim.

This calcite property is most unusual, in that this chrysalized mineral is a glossy colored assortment of black and white CaCO_3 . It has the overall shiny appearance of marble, but it is softer, and has not undergone the metamorphism necessary to alter it into marble. The major part of the NE bank of the wash (where the road is) shows that this bed of mineral is about 9 ft. high and 100 ft. long. Mr. Campbell stated that in the past, he has sold about \$10,000.00 worth of this calcite for building rock, roof covering, and ornamental surface decoration around gardens and swimming pools. He will sell this quarry run material by the ton.

The calcite, and neighboring limestone rocks, are most interesting from a geologic point of view. A David Saunders, geologist (originally from Wickenburg), wrote a thesis to obtain his Masters degree in geology (Northern Arizona University) on this region. He found it to be carbonitites.

Los Angeles, California.

My dear Mr. Garland:

Mr. Frank Deiter, 1328 East Washington, Street,
Phoenix, Arizona, who is owner of the BANKER MINE in the Vulture
Mining District, Maricopa County, has asked that I send you
the enclosed copy of assay sheet covering sample of lime from
this mine.

Mr. Deiter is most anxious to know if there is a
market for this product, and I should appreciate your advising
him in the matter.

Thanking you in advance, I am

Yours very truly,

Classification: Prospect

(See other side for general information)

General Information: A body of crystalline calcite occurs in volcanic breccia, the deposit having a known length of 300 feet, a width of 100 feet, and a depth of 50 feet. Attitude of the deposit could not be recognized but the elongated body trends in a north-easterly direction. It has been explored by several shallow opencuts. No work was being done and no equipment was on the property at time of visit. The owner has sold 15 tons of this calcite for roofing granules.

Character of Ore: A body of crystalline calcite mineralization in volcanic breccia.

Equipment (Date 12/17/57): None
