Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

CHICAGO GROUP

The Chicago group of four claims is situated on the north side of Cerbat Canyon, about 12 miles by road south of Chloride. The group is owned by J. A. Bell of Summerton, Ariz., and B. Ableman of Chloride.

There are a number of short tunnels, shallow shafts, and pits, all on oxidized outcrops of veins. One sample of oxidized vein material was cut at the bottom of a 30-foot shaft. The sample, taken over 2.5 feet, assayed 0.4 percent lead, 0.2 percent zinc, 0.06 percent copper, 1.9 ounces per ton silver, and a trace of gold.

CERBAT MINE

Location, Accessibility, and Ownership

This property is on a western spur of the Cerbat Range north of Kingman and south of Chloride. The mine is reached by turning to the east off paved U. S. Highway 93, 7.7 miles south of Chloride and following a dirt road 3.7 miles, and then turning left on a branch road that leads to the Cerbat mine about 1 mile north. The last mile of the road is impassable.

There are five claims in the group, owned jointly by F. A. Morrison, of Kingman, who is in charge of the property, and the Pelton brothers. Three of the claims are patented and two are unpatented.

History

The property was worked intermittently during the period 1869 to 1906 for gold and silver. It was credited with a production of \$200,000 in gold and \$50,000 in silver.^{16/} The mine was acquired by the present owners in

^{16/} Arizona Bureau of Mines, Arizona Metal Production: Bull. 140: ser. 19.

MEMORANDUM:

This property is described in Bureau of Mines " Report of
Investigations, R.I. 4101, August 1947" on page 36
