Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

AZBM (AZ GEOLOGICAL SURVEY) FILE DATA

Cabralla Mine

10 miles NW of Salome in Tank Hill
Yuma County

reference: Arizona Dept. of Mineral Resources
Cabralla Mine (file)

present owner:

minerals: copper, gold

history of the area:

in 1940 the property was owned by
Ernest R. Hall and A.T. Pryor of
Salome, Arizona. Some development work
was done but no quantity of
commercial ore had been found.

geology:

country rock is limestone and quartzite
in contact with schist. Limestone
dips 35° NE.

property consists of 8 claims

DEPARTMENT OF MINERAL RESOURCES
State of Arizona

FIELD ENGINEERS REPORT

MINE CABRALLA (8 claims)

DATE Feb. 15, 1940.

DISTRICT Ellsworth, Yuma County.

ENGINEER

SUBJECT:

SYNOPSIS REPORT

OWNER: Ernest R. Hall & A. T. Pryor, Salome, Ariz.

LOCATION: Located in Tank Pass Canyon, 10 miles N. W. of Salome, from which place it is reached by a fair road.

GEOLOGY: Country rock is limestone and quartzite contacting with schist. Lime strata are tilted at angle of 35 deg. from horizontal N. E.

DEV. WORK: One 250-ft. inclined shaft was sunk years ago on one of the lime strata, which has partly been replaced by copper carbonate and chalcocite carrying gold values. Other work consists of 500 feet of tunnels and other work within the lime formation, also showing small replacement bodies and lenses of the same kind of ore.

OPINION: While no commercial ore has been found in quantity in this mine, it is believed that extensive and well-planned development work, mainly following the ore veinlets, should result in the discovery of massive replacement bodies of COPPER ORE, carrying GOLD values, of considerable importance.

TERMS: Property for sale on long-term lease and option - no cash down.
