Arizona Department of Mines and Mineral Resources Mining Collection

## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

MILS #512 (new)

Western States Stone produces flagstone from these unpatented claims using small crews of between 2-4 men. The quarry men are typically mexicans working in the United States with green cards. They are paid based upon their production, but they must produce enough to earn minimum wage.

The quarry operation proceeds as follows: the soil and aluvium is removed. Holes are drilled and shot down natural joints in the sandstone. Enough explosive is used to "bump" a block free to work on. Then using double jacks and wedges the sandstone is split parallel to bedding planes into the desired thickness and loaded onto skids to be hauled to the Ashford Stoneyard W.S.S. (f) to be processed. Averaging value of a skid of flagstone at the quarry is \$50.00.

Date: 9/5/85
