Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

15 December 1980.

Memorandum for the Record.

° Dove claims (lithium) Vulture Mountains, about 6 miles West of Morrystown, Az.

On December 6, 1980, the writer, accompanied by August Gangola, Las Vegas, Nev., 89106, and J. David Campbell, Box 1297, Wickenburg, Az. 85358, visited the 2 Dove claims, about 1500 feet South and high above the Garcia Mine. These claims are owned by Mr. Campbell and are on an extensive pegmatite dyke along a high ridge in the mountain. There are 2 open pits containing Lepidolite, spodumane, and amblygonite, that have been mined in the past by Mr. Campbell.

Outcrops of the mentioned pegmatite dyke can be observed for a considerable distance. Mr. Campbell states that he has shipped several carloads of commercial grade lithium ore to Foote Chemicals, some years ago.
