Arizona Department of Mines and Mineral Resources Mining Collection

## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES  
STATE OF ARIZONA  
FIELD ENGINEERS REPORT

Mine FERGUSON GROUP

Date October 2, 1942

District Bigbug

Engineer A. C. Nebeker

Subject: Production Possibilities

Here is a little property out from Cordes Northeast four miles consisting of 4 claims. Mr. L. King and partner went on this as lessee ten days ago and since then shipped 20 tons of 20% copper to Clarkdale Smelter, and have opened up a very strong face of ore about 5 feet below the surface. They have also dug into several other croppings and have exposed copper ore of different grades in each hole they have dug.

They are doing all hand work at present but are in hopes that they will be able to get some machinery in the near future.

From the workings on this property many tons of low grade copper ore is in sight, all of it being a carbonate.

Signed: A. C. Nebeker
