ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Date September 12, 1939

Mine Fiesta Group

District - Kirkland Dist.

Yavapai Co.

Former Name - Not known

Owner - Sam S. Penney

Operator - Same

President - No corporation

Mine Supt.

Principal Metals - Molybdenum, lead,
silver, gold

Production Rate - Not established

Power: Amt. & Type - None

Operations: Present - Idle

Operations Planned - Depend on financing

Number Claims, Title, etc. - 3 unpatented lode claims, to wit: Fiesta, Mary Jane and Nettie Ann.

Note up approximate location to determine class of land.

Description: Topography & Geography - Located on southside Kirkland Creek beginning in foothills and extending up medium high mountain.

Mine Workings: Amt. & Condition - 1 tunnel on Fiesta claim, 75 ft. length
1 tunnel on Mary Jane, 60 ft. length
2 open cuts on Nettie Ann
All workings open and accessible.

Geology & Mineralization - Country rock quartz, porphyry cut by quartz veins. General trend of veins NE-SW, dip SE at about 60 degrees. Average width 15 ft., varying from 1 ft. to 30 ft. at outcrop. No development below the oxidized zone. Lead carbonate, specs. of galena and iron oxides showing. Free gold can be panned.

Ore: Positive & Probable, Ore Dumps, Tailings - No tonnage of ore developed. Ore exposed in most workings. Vein showing molybdenum has width of 6 ft. between walls. Molybdenite ore assayed 0.15 gold, 7.0 oz. silver, 85% MoS_2 .

Mine, Mill Equipment & Flow Sheet - None

Road Conditions, Route - Road from Kirkland Jct. to Wells Ranch, $2\frac{1}{2}$ miles, is graded highway. Roads from Wells Ranch to prospects washed out.

Water Supply - Plenty of water in Kirkland Creek.

Brief History - Located by Elmer E. Penney about 1916 who did assessment work for several years. Relocated by present owner in 1937 who did location work and assessment work for the year ending 1940.

Special Problems, Reports Filed - No engineer's report.

Remarks - I have confidence that these prospects have merit and justify development. Want to have them examined by a field engineer of the Department of Mineral Resources.

If property for sale: Price, terms and address to negotiate - Would prefer to keep the claims and get backing to develop. I am an experienced miner and could carry on work economically. Will give a half interest for \$1,200 to be spent on development at the rate of \$100 per month and believe can accomplish 200 ft. of work.
Would give lease and option on 3 claims for \$1,500 payable in 1 year.
