INSPIRATION CONSOLIDATED COPPER COMPANY

INSPIRATION, ARIZONA

June 13, 1961

Mr. W. H. Detamore 4225 N. 47th Priva Phoenix, Arizona

Dear Mr. Detamore:

The two samples you brought in on June 6, 1961, from the Fisher property in Graham County, Arizona, assayed as follows:

High Grade - 3.35% Copper Low Grade - 3.70% "

The material we called low grade has more copper in it than I expected. This material could probably be shipped to the Smelter if the mining costs were low.

We will get in touch with you later.

Sincerely,

6. 7. Caal

E. F. Reed Chief Geologist

Magma Copper Company

August 18, 1960

Mr. W. H. Detamore 4225 North 47th Drive Glendale, Arizona

Dear Mr. Detamore:

Your property was brought to the attention of the General Manager, Mr. Darrell Gardner, who stated that the Magma Copper Company would not be interested in your claims at this time.

I wish to thank you and your wife for the trip to your property.

The sample that you gave me with the good copper color averaged 5.30% copper, 0.60 ounces silver, and 0.02 ounces gold. The two foot cut that I took in the tunnel on the fault averaged 1.00% copper, 0.20 ounces silver, and 0.01 ounces gold.

Very truly yours,

Aussell Webster Chief Geologist

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA

FIELD ENGINEERS REPORT

Mine Fisher Mine

Date September 2, 1960

District Aravaipa District (Klondyke) Graham Co.

Engineer Lewis A. Smith

Subject:

Interview with W.H. Detamore, 4225 N. 47th Drive, Phoenix (Ap 8-4180)

Location: 6 miles east of Klondyke

Owner: . W. H. Detamore et al, 4225 N. 47th Drive, Phoenix (relocated)

Original Owner: .L. Fisher (now deceased) - Located in 1908

Property: 5 unpatented claims

Work: Three tunnels along a wash on the same elevation.

1. The East tunnel is 350 feet long.

2. The Middle tunnel is 60-65 feet long.

3. The West tunnel is 40 feet long.

The tunnels all show leachable ore in certain zones. A pit, sunk recently, at an elevation of 40 feet below the hill crest disclosed sulphides.

Future plans: It is planned to construct about 3 miles of mine road to the area from the Klondyke to Fort Thomas road. They also plan to build redwood vats in succession for leaching the low grade oxidized ores. These vats will be supplemented by a small crusher, screens and water control pumps. The higher, or sorted ore, will be snipped to Inspiration.

Geology: The area consists of monzonite which has been shattered and sheared in an E-W direction. 6 or 7 veins in the shear zones) crisscross in a stockwork. These generally strike E-W and dip 60-70 degrees to the north. The oxidized copper minerals are chrysocolla, melaconite, cuprite and limonite, all of which are disseminated in the shears and fault gouges. The shear walls are more or less indefinite but the mineral zones are fairly clearly outlined. The sulphides appear from specimens to be disseminated in chrysocolla stained silicified zones in the monzonite. Quartz is not prevalent, but is locally concentrated as blebs and small areas. The sulphides exhibit some alteration to limonite in halos around the sulphide grains. The chalcopyrite is tarnished and pitted, but showed in the pit at a short distance from the surface. The leach ore runs about 62% silica and up to 3% copper. The shipping ore is about 7-10 percent. The ore zones range between 2-8 feet wide, the average being 4 feet.

The haul to Fort Thomas is about 21 miles.

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA FIELD ENGINEERS REPORT

'Fisher Mine Mine

Date January 22, 1964

District Aravaipa District, Graham Co.

Engineer Axel L. Johnson

Subject: Field Engineers Report. Information from Mrs. W.H. Detamore

References:

- (1) U.S.G.S. Bulletin #763 pages 103-105 incl., "Geology and Ore Deposits of the Aravaipa and Stanley Mining Districts, Graham Co., Arizona, "by Clyde P. Ross.
- (2) Report of Aug. 20, 1962 by Frank P. Knight. (3) " Sept. 2, 1960 by Lewis A. Smith.
- (4) 4 copies of assay reports

Location: See Report of Aug. 20, 1962.

Owners: Mr. W. H. Detamore was deceased on Dec. 24, 1963, leaving his interest to Mrs. W.H. Detamore, 4225 N. 47th Drive, Phoenix 31, Arizona, & Harvey Gamel (Mrs. Detamore's uncle).

Number of Claims: 5 unpatented mining claims in the Coronado National Forest.

Principal Minerals: Copper minerals - mixed oxides and sulphides - chrysocolla, melaconite, cuprite, chalcopyrite, chalcocite, covellite etc.

Present Mining Activity: Mine now idle.

Geology & Mineralization: See report of Sept. 2, 1960.

Ore Values: See report of Aug. 20, 1962. Also see copies of assay reports.

Milling & Marketing Facilities: No mill on property. Ore would have to be hauled a distance of 21 miles to Ft. Thomas, the first 3 miles over a recently constructed mine road, and the last 18 miles over a ranch road.

Past History:

(1) Located by Mr. Fisher (Mrs. Detamore's grandfather) about 60 years ago.

(2) Acquired by W.H. Detamore about 20 years ago.

- (3) Mr. Detamore built 3 miles of road from the Holladay Ranch road to the mining claims. The road work was started in Oct. 1960 and finished in Feb. 1963. On account of the rough terrain and recent washouts, a jeep or 4 wheel drive would be required for traveling the last 2 miles to the mining claims.
- (4) Claims were left to Mrs. W. H. Detamore by her husband, who passed away on Dec. 24, 1963.

- Old Mine Workings: (1) 1 adit, 350 ft. long
 - (2) 2 vertical shafts of unknown depth, one of which is filled with water.
 - (3) 1 adit, 65 ft. long
 - (4) 1 adit, 40 ft. long
 - (5) 1 stockpile, containing several hundred tons of ore, assaying from 2 to 3% copper.

Proposed Plans: Property is for sale or lease. Terms of sale or lease is open for negotiations. Following equipment, now on the property, will be available for use by the (4) 1 stoper and 3 jackhammers buyer or lessee: (1) 1 large air compressor

(2) 1 large truck

(5) Drill bits and air hose

(3) 1 end loader

FIELD ENGINEERS REPORT

Mine Fisher Prospect

Date August 20, 1962

District Graham County

Engineer Frank P. Knight

Subject: 1

Interview with W. H. Detamore.

Approx. location: N.E. cor. Sect. 7, T. 6 S., R. 21 E., about 3 mi. west of Holladay Ranch and Black Rock.

Rugged country - long haul - about 21 (?) miles to R.R.

Owner: - W.H. Detamore - reports several veins in a 20 ft. wide zone. The veins are said to run 3 to 4 per cent copper (chrysocolla and some chalcopyrite).

The better rock from the dump has assayed 2.25% Cu. An independent sample 4 ft. across a vein ran 0.61%. Granite wall rock ran 0.08% (independent sample). A Detamore sample ran 5.3%. An independent sample ran 1 plus % Cu, 0.6 oz. Ag, 0.02 oz. Au.

Detamore plans to build $1\frac{1}{2}$ miles of road and to batch leach 4 or 5 tons per day in redwood vats. Urged testing by Roseveare and Detamore plans to send him 100 lbs.
