Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

WALTER BARTOL

IBLA 75-88

Decided March 3, 1975

Appeal from the decision of the Arizona State Office, Bureau of Land Management, rejecting appellant's mineral patent application A-7946.

Affirmed.

1. MINING CLAIMS: PATENTS - Rejection - Surveys and Development Work

Where a regulation requires that a mineral patent application be accompanied by a plat and field notes of a mineral survey executed subsequent to the date of location of the mining claim and a surveyor's report of expenditures and improvements, an application for mineral patent not accompanied by these documents is properly rejected without prejudice to applicant's right to file a proper application.

APPEARANCES: Hale C. Tognoni, Esq., Phoenix, Arizona, for appellant; Fritz L. Goreham, Esq., Office of the Field Solicitor, Phoenix, Arizona, for the government.

OPINION BY ADMINISTRATIVE JUDGE HENRIQUES

Walter Bartol appeals the decision of the Arizona State Office which rejected his mineral patent application, A-7946, on the grounds that the Ford lode had not been surveyed as required by the regulations. 43 CFR 3861.1-2. The application was accompanied by a copy of MS 4421, approved May 29, 1957, of the Ford lode. The patent application is based on the Ford lode mining claim located December 17, 1969.

The original Ford lode mining claim was located on July 26, 1926. Appellant Walter Bartol subsequently acquired the claim and filed an amended location in 1956. The claim was then surveyed under Mineral Survey No. 4421, approved on May 29, 1957.
