Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine Frank Thresher property

Date Feb 18th 1948.

District White Pacacho

Engineer A.C.Nebeker

Subject: Brief report.

This property was visited on Feb 18th, 1948.

LOCATION:

This property is 16 miles east and north of Morrystown, Ariz. up at the head of Tribly Wash. The old Tribly mine is on the north and the Independence mine about 1 miles southeast. A good road from Morrystown to the property.

The property consists of 8 lode claims.

OWNER AND OPERATOR:

The owner of the property is Frank Thresher and is leased to Geo. Cook and partner who are now working it. Address Morrystown,

FORMATION:

The formation is schist and amphibole schist, having a strike east-west and a dip to the north. There are several plugs of dike rock consisting of quartz tourmaline and feldspar outcropping.

TOPOGRAPHY:

Medium rough.

Development consists of several surface cuts, two tunnels and a 140 foot vertical shaft, none of these are being worked at this time.

The present work is a 12 foot hole on the vein about 200 feet east of the vertical shaft. The vein is from 6 inches to two feet wide. The vein has the same strike as the formation and appears to be vertical.

ORE :

The ore is a lead, silver, gold in a gangue of quartz. Picked samples assay \$9.00 gold, 26 oz silver and 49% lead. No shipments as yet.

Hand mining being done as they have no other equipment.

4 men working.

Water hauled in.
