## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ARIZONA DEPARTMENT OF MINES AND MINERAL RESOURCES FILE DATA

PRIMARY NAME: GIANT MINE

ALTERNATE NAMES:

GRAND MOUNTAIN  
LITTLE GIANT

PIMA COUNTY MILS NUMBER: 64

LOCATION: TOWNSHIP 20 S RANGE 7 E SECTION 30 QTR. NW

LATITUDE: LONGITUDE:

TOPO MAP NAME: AGUIRRE PEAK - 7.5 MIN

CURRENT STATUS: UNKNOWN

COMMODITY:

UNKNOWN

BIBLIOGRAPHY:

ADMMR GIANT MINE FILE

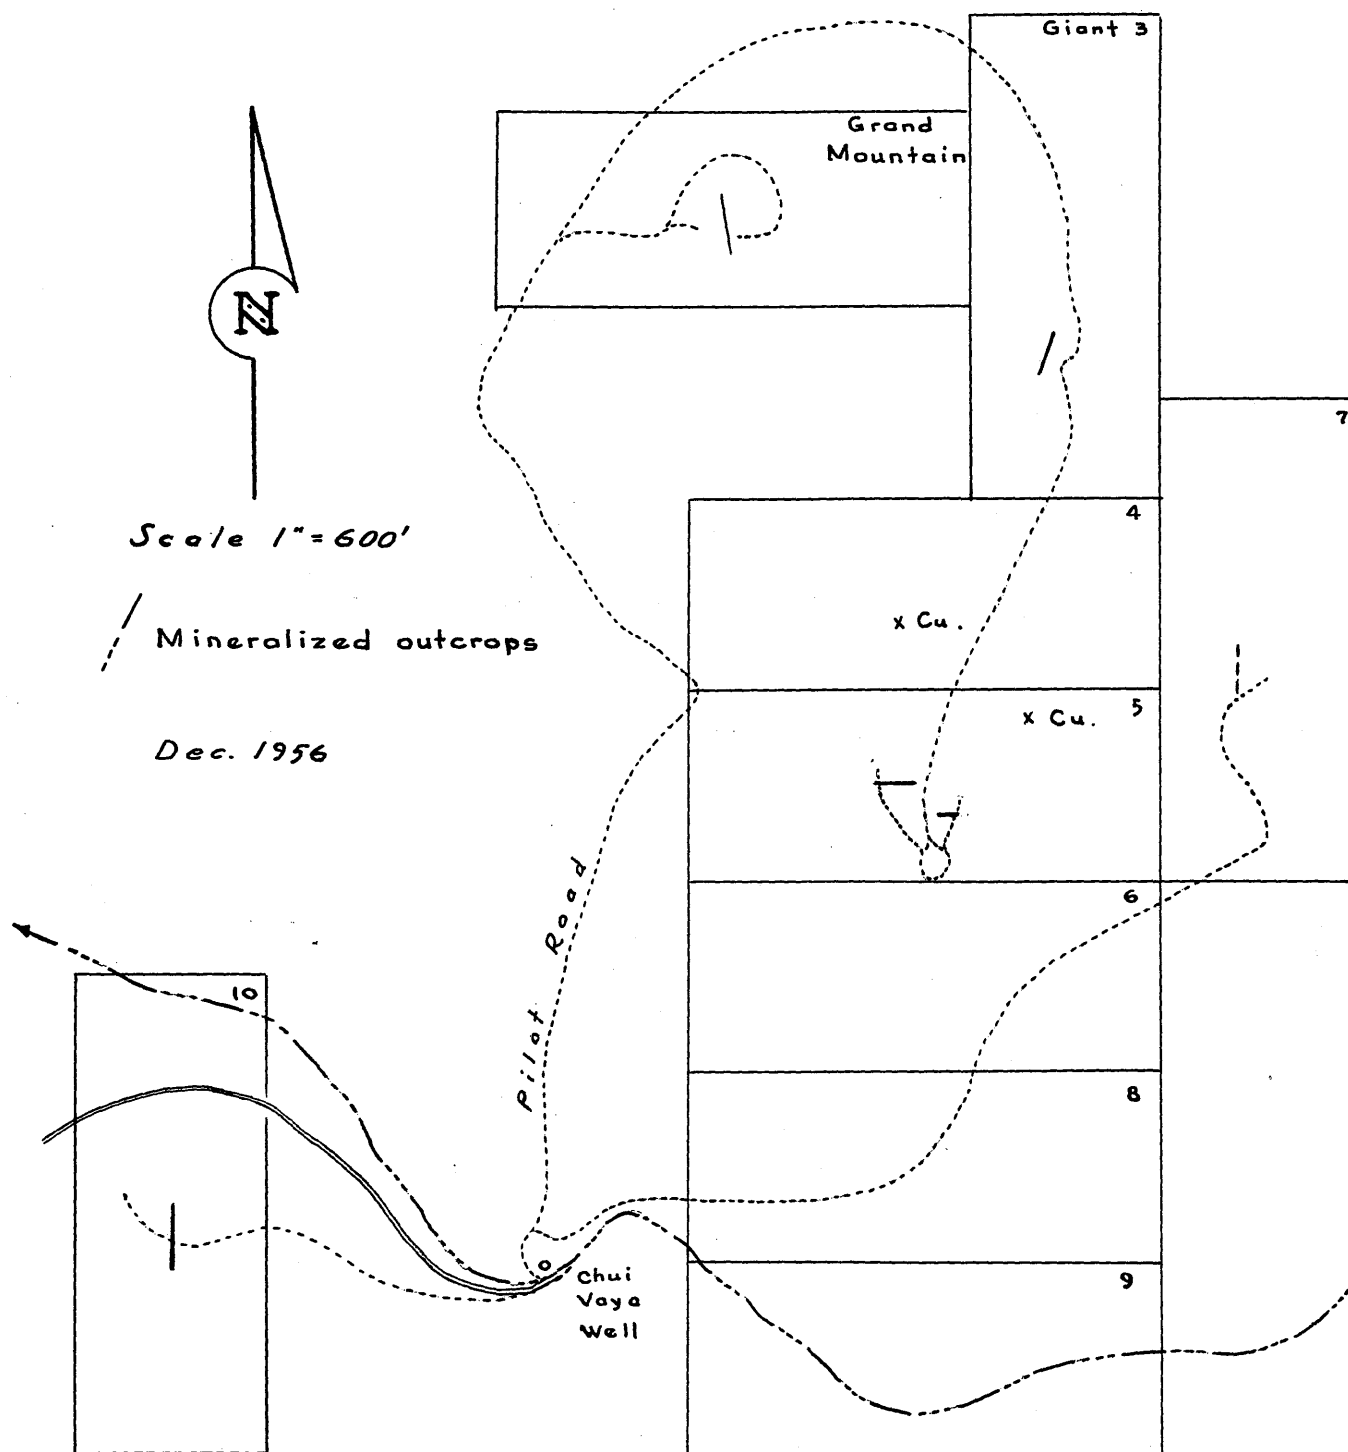

FIG.27 -CLAIM MAP, GIANT TUNGSTEN GROUP  
PIMA COUNTY, ARIZONA

CINDERRA MINING & ENGINEERING CO.  
208 Main Street  
Dallas, Texas

MINE: LITTLE GIANT (also called "Giant Group), Baboquivari Dist.,  
Pima County. - 8 unpat'd claims.-27 Mi.S of Sells.

OWNER: Cinderra Mining & Eng. Co. -  
Kenneth Gordon, Pres. 208 Main St., Dallas, Texas  
M. F. McKnight, Eng. in Charge, Box 36, Sells Star Rt., Tucson

OPERATOR: Same as above. 5/29/56

MILL: CINDERRA MILL, Pima County -  $5\frac{1}{2}$  Mi. E of Sells.

OWNER: Same as above. 5/29/56

DEPARTMENT OF MINERAL RESOURCES  
STATE OF ARIZONA  
FIELD ENGINEERS REPORT

\* Mine Little Giant Mine (also called 'Giant Group') May 29, 1956 & April 13, 1956

District Baboquivari District -- Pima County Engineer Axel L. Johnson

Subject: Field Engineer's Report -- Information from M. F. McKnight and J. L. Mercer.

Location About 27 miles south of Sells. Drive south of Sells for about 20 miles. Turn east and drive about 7 miles to the mine.

Number of Claims 8 unpatented claims.

Owners Cinderra Mining and Engineering Co. 208 Main St., Dallas, Texas.  
(bought mine on direct sale from J. L. Mercer)

Operators Same as above

Officers Kenneth Gordon, President, 208 Main St., Dallas, Texas.  
M. F. McKnight, Engineer in Charge, Box 36, Sells Star Route, Tucson, Ariz.

Principal Minerals Tungsten ore in the form of scheelite.  
Copper ore with high silica content.

Number of Men Employed 2 men.

Production Rate No production rate established, as work has just started. Mostly exploration work to date. 12 tons of high silica copper ore stockpiled.

Geology Mr. Mercer reported one scheelite vein, from 7 to 8 ft. wide, and three separate copper veins running about 3 % copper and 80 % silica.

Ore in Sight and Probable No ore in sight. Probable ore uncertain.

Milling and Marketing Facilities The tungsten ore mined will be hauled to the Cinderra mill 5 1/2 miles east of Sells, owned by the company for milling. The copper ore mined will be hauled to the Ajo smelter.

Present Operations Overburden is being stripped with a bulldozer, for exposing low grade, high silica copper ore to be mined by open cut operation. Some ore has been mined on one of the veins, but is reported to have been pinched out. A second vein is now being opened up. 12 tons of ore has been stockpiled awaiting shipment.

Proposed Plans Operators plan to mine some high silica copper ore and truck same to the Ajo smelter.

Operators plan on mining tungsten ore, truck same to ~~their~~ their Cinderra mill for milling, and also up grade the concentrates at their own mill. They intend to do this after they find out that the tungsten GSA purchase program has been extended.
