ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Operations Planned: Mr. John H. Shutt of Akron, Ohio (64 Mt. View Ave.),
expects shortly to work the placers in question on a
large scale.

Number of Claims, Title, etc: 36 by location.

Description - Topography & Geog: Mountains along Canyon from west line of Forest
Reserve down the C. del Oro Canyon.

Mine workings - Amt. & Condition: Placer excavations which are usually covered
after big floods.

Geology & Mineralization: Granite and gravels containing placer gold - also rare metals - average 40 ¢ per cu. yard.

Ore - Positive & Probable, Ore Dumps, Tailings:

Mine, Mill Equipment & Flow Sheet:

Road Conditions, Route: From Highway down to Copper Hill wash to Canada del Oro Canyon - road fair, new road should be built above canyon on north side on account of reservoirs and placer mining.

Water Supply: Intermittant - reservoirs should be built along canyon.

Brief History: Placers have been worked on a small scale for over hundred years.

Special Problems, Reports Filed: The development of water is most important for placer mining - by building reservoirs at suitable places.

Remarks: These placers are workable on a large scale. Reports made by W. L. Cochrane and Mr. Jaekel of Toronto, Canada.

If property for sale - Price, terms and address to negotiate:

The property is for sale or for leasing on a large scale. Terms.
