Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ADMMR GOSS PROSPECT FILE

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine Goss Prospect

Date July 6, 1961

District Green Valley, Gila Co.

Engineer Lewis A. Smith

Subject: Interview with Jim Goss

Property: 2 claims

Location: 1 mile southwest of the Payson Golf Course.

Owner: Jim Goss, Payson

Work: One bulldozer cut 4 feet deep, 100 feet long and 10-12 feet wide.

Geology: Mr. Goss reported that a couple of shear fractures cut across the schistosity and are sporadically mineralized by copper oxide minerals and some chalcocite residuals. The specimens he had, show much this same thing accompanied by strong iron oxide impregnation and in vugs. The limonite showed some copper indications. The schist in this area is intruded by diorite and andesite porphyry both in dikes and in irregular masses.
