Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

STATE OF ARIZONA

FIELD ENGINEERS REPORT

✓
Mine Gould-Hunt Group

Date 6-3-58

District Green Valley (Sec. 9, T 10 N, R 9 E

Engineer Lewis A. Smith

Subject: Mine Visit

This property lies adjacent to the south of the J. Gould Property in Section 9.

✓
Owners: G. O. Gould and Alma Hunt

✓
G. O. Gould, Agent - 580^{1/2} S Ninth Place, Phoenix

Development Work: One large bulldozer cut, 400' long and up to 35' on the face, cut across a dike of basic to intermediate igneous rock (andesite-porphry (?) or diabase or both). The dike has copper mineralization to a limited degree. It dips 60° West, and strikes N-S to N 10° W. It is strongly stained by iron oxides and contains some magnetite. The copper minerals are chrysocolla and "grey" copper (probably chalcocite). Several small cuts mainly were in sheared diorite. Some drilling was done along the big cut, but the results are not known.

The intrusive here may be a continuation, or appendage, of the dike on the J. Gould Property to the North. J. Gould will get his brother to fill out a Mine Owner's Report.
