Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ARIZONA REPUBLICAN. SUNDAY MORNING, OCTOBER 29, 1916

An Allotment of Only 50,000 Shares of the Treasury Stock of

THE GRAND ISLAND MINING COMPANY

Located in Verde Mining District, Jerome, Arizona. In close proximity to the famous Copper Chief Mine,

IS NOW OFFERED THROUGH US

AT 75c PER SHARE

Subscriptions must be in my hands before November 1st.

This is one of the older Verde mining district properties, on which intermittent work has been done for 20 years. It is one of the best looking properties and has one of the best showings in the district.

Examined and Favorably Reported by W. E. Defty, Mining Engineer.
You must act quickly if you want some of this stock.

The general geological characteristics of the Grand Island property are very similar to that of the **COPPER CHIEF**. The trend of the ore bodies in the **Copper Chief** are toward and into the Grand Island.

The first 250 feet of the **Copper Chief** from the grass roots is principally gold. At this depth the oxidized ores occur, and at about 350 feet the sulphide ores are being developed. All of these ores carry high gold values, the sulphides ranging from \$50 to \$100 per ton **GOLD, COPPER** and **SILVER**.

The **GRAND ISLAND** has similar outcrops which cover a large area. These outcrops average about \$6.00 per ton gold. They show a large vein from 5 to 12 feet in width, dipping into the mountains.

There is a **SMALL PLANT ON THE PROPERTY READY TO PUT INTO OPERATION FOR IMMEDIATE DEVELOPMENT**. So this property will verge into a scene of activity and development **PUSHED as RAPIDLY as POSSIBLE**. All conditions are exceptionally favorable for economical operations and productions.

The people who direct the affairs of the Company are numbered among the best and most successful business and mining men in the district. It will be in the heart of activity as it is **NEAR the GREEN MONSTER** and the **EQUATOR** or **IRON KING**, belonging to the **UNITED VERDE**, and joins the **COPPER CHIEF**.

THIS IS ALMOST A READY-MADE PROPERTY, WITH CONSIDERABLE ORES, PROVEN, ALL READY TO AND WILL BEGIN DEVELOPMENT IMMEDIATELY.

All proceedings passed upon by the Arizona Corporation Commission and permit issued for Sale of Stock.

OFFICERS AND DIRECTORS

PRESIDENT, Hon. Robert E. Morrison, Prescott.
VICE PRESIDENT, Paul Smyley, Jerome.
SECRETARY, Ed. Rucker, Jerome.
TREASURER, D. J. Shea, Jerome.
DIRECTOR, W. W. Elliott, Prescott.
