ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

12. Operating Company:
13. Pertinent People and/or Firm:
14. Commodities: Gold, specimens-native gold, tungsten-scheelite, lead-sulfide
15. Operational Status: sporadic pilot plant
16. Summary of information received, comments, etc.:

Mr. Scovel brought in spectacular specimens of free gold in quartz and in limonite boxwork after pyrite and galena along with specimens of scheelite in quartz and panned scheelite concentrate. A specimen of free gold in boxwork was donated to the museum (cataloged as MM-N846). He was primarily interested in the market for scheelite concentrate. He has a small table and is considering producing a gold concentrate and possibly a scheelite concentrate.

He was provided with a list of possible scheelite buyers and of exploration companies that might be interested in his property. The coarse free gold, even if in a narrow vein should be sufficient to interest a small exploration company into looking at the property.
