## United States Department of the Interior

## OFFICE OF HEARINGS AND APPEALS

## INTERIOR BOARD OF LAND APPEALS

4015 WILSON BOULEVARD

ARLINGTON, VIRGINIA 22203

FLOYD R. BEKINS, JR.

IBLA 83-375

Decided August 10, 1983

Appeal from decision of Arizona State Office, Bureau of Land Management, declaring unpatented mining claims abandoned and void. A MC 82929 through A MC 82944, A MC 82948 through A MC 82958.

Affirmed.

1. Federal Land Policy and Management Act of 1976: Recordation of Affidavit of Assessment Work or Notice of Intention to Hold Mining Claim—Mining Claims: Recordation

Under sec. 314 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. § 1744 (1976), the owner of a mining claim located before Oct. 21, 1976, must file a notice of intention to hold the claim or evidence of performance of annual assessment work on the claim by Oct. 22, 1979, and prior to Dec. 31 of each year thereafter. This requirement is mandatory and failure to comply is deemed conclusively to constitute an abandonment of the claim by the owner and renders the claim void.

2. Federal Land Policy and Management Act of 1976: Recordation of Mining Claims and Abandonment—Mining Claims: Abandonment

The conclusive presumption of abandonment which attends the failure to file an instrument required by 43 U.S.C. § 1744 (1976) is imposed by the statute itself. A matter of law, it is self-operative and does not depend upon any act or decision of an administrative official. In enacting the statute, Congress did not invest the Secretary with authority to waive or excuse noncompliance with the statute, or to afford claimants any relief from the statutory consequences.

INDEX CODE:  
43 CFR 3833.2

APPEARANCES: Floyd R. Bekins, Jr., pro se.

OPINION BY ADMINISTRATIVE JUDGE HENRIQUES

Floyd R. Bekins, Jr., appeals from the decision of the Arizona State Office, Bureau of Land Management (BLM), dated January 6, 1983, which declared the unpatented Redhill Nos. 1 through 16, Padres, Padres Nos. 2 through 6, Padres No. 15, Padres No. 18, and Hester Nos. 3 through 5 lode mining claims, A MC 82929 through A MC 82944, A MC 82948 through A MC 82958, abandoned and void for failure to file on or before December 30, 1981, evidence of performance of annual assessment work or a notice of intention to hold the claims, as required by section 314 of the Federal Land Policy and Management Act of 1976 (FLPMA), 43 U.S.C. § 1744 (1976), and 43 CFR 3833.2.

Appellant states that the 1981 assessment work was performed and the necessary proof of labor was recorded in Pima County, Arizona, August 26, 1981. Two copies of the proofs of labor for several groups of unpatented mining claims were taken personally by appellant to the BLM office in Phoenix and presented to the receiving clerk with a request that the duplicate of each proof of labor be stamped and returned to him. He did not check each instrument returned to ascertain that it had been stamped by BLM. While preparing the proofs of labor for 1982, he discovered that both copies of the 1981 proof of labor for the claims in Pima County were in his file and neither showed a BLM stamp.

BLM states it has no record of receipt of the subject proof of labor, and concedes it is possible the subject proof of labor was overlooked, but appellant has not presented conclusive evidence that the proof of labor was actually submitted for filing.

[1] Under section 314(a) of FLPMA, the owner of a mining claim located before October 21, 1976, must file evidence of performance of assessment work or a notice of intention to hold the claim with the proper office of BLM by October 22, 1979, and on or before December 30 of every calendar year thereafter. This requirement is mandatory, not discretionary, and failure to comply is conclusively deemed to constitute abandonment of the claim by the owner and renders the claim void. Lynn Keith, 53 IBLA 192, 88 I.D. 369 (1981),<sup>a</sup> James V. Brady, 51 IBLA 361 (1980).<sup>b</sup>

[2] With respect to the conclusive presumption of abandonment and the argument that the intent not to abandon was manifest, we stated in Lynn Keith, supra:

The conclusive presumption of abandonment which attends the failure to file an instrument required by 43 U.S.C. § 1744 (1976) is imposed by the statute itself, and would operate even without the regulations. See Northwest Citizens for Wilderness Mining Co., Inc. v. Bureau of Land Management, Civ. No. 78-46 M (D. Mont June 19, 1979). A matter of law, the conclusive presumption is self-operative and does not depend upon any act or decision of an administrative official. In enacting the statute, Congress did not invest the Secretary of the Interior with authority to waive

a) GFS(MIN) 86(1981)

b) GFS(MIN) 22(1981)

or excuse noncompliance with the statute, or to afford claimants any relief from the statutory consequences. Thomas F. Byron, 52 IBLA 49 (1981).<sup>c</sup>

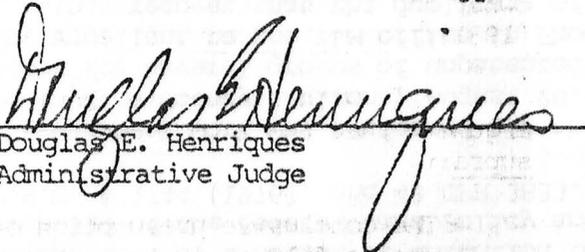

\* \* \* Appellant also argues that the intention not to abandon these claims was apparent \* \* \*. At common law, evidence of the abandonment of a mining claim would have to establish that it was the claimant's intention to abandon and that he in fact did so. Farrell v. Lockhart, 210 U.S. 142 (1908); 1 Am. Jur. 2d, Abandoned Property §§ 13, 16 (1962). Almost any evidence to show to the contrary would be admissible. Here, however, in enacted legislation, the Congress has specifically placed the burden on the claimant to show that the claim has not been abandoned by complying with the requirements of the Act, and any failure of compliance produces a conclusive presumption of abandonment. Accordingly, extraneous evidence that a claimant intended not to abandon may not be considered. [Emphasis in original.]

53 IBLA at 196-97; 88 I.D. at 371-72.

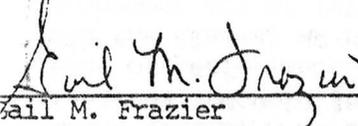

Although there is a presumption by public officials in the performance of their official duties, the presumption is rebuttable. Bernard J. Braker, 54 IBLA 332 (1981);<sup>d</sup> L. E. Garrison, 52 IBLA 131 (1981).<sup>e</sup> Appellant has not conclusively established that he presented the 1981 proof of labor to BLM.

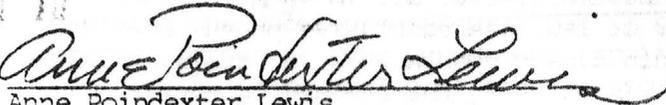

Although appellant could have presented the proofs of labor as he has indicated, it seems most unlikely that the BLM receiving clerk would have overlooked stamping both copies, as the receiving stamp used by BLM is electrically operated, showing the time by minutes, and requires that each sheet be inserted manually and individually. If the proof of labor for the subject mining claims was, in fact, in the tendered folder, we believe that the clerk would have stamped them as requested. Further, appellant has not explained why he did not check the copies returned to him to be assured that he had copies of all six proofs of labor.

Therefore, pursuant to the authority delegated to the Board of Land Appeals by the Secretary of the Interior, 43 CFR 4.1, the decision appealed from is affirmed.

**CHAS. G. RUSSELL**

218 NORTH FOURTH AVENUE

TUCSON - ARIZONA

July 9th.1950

Mr.Chas.H.Dunning,  
Dept. of Mineral Resources,  
Phoenix,Arizona.

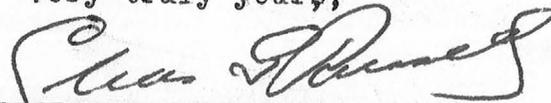

Dear Mr.Dunning:

I have a copy of your letter to Mr.Seton Williams with reference to the Padres-Hester, also copy of Mr.Williams reply.

Mr.Williams was advised immediately upon receipt of Mr.Hughes'letter setting a definite date to examine the property that they had the refusal on it. Miami's geologist,Mr.Fowells and I spent Thursday July 6th.on the property. Obviously,its too soon to expect any information regarding their decisions. I have, however experienced so many disappointments and turn downs on the Padres by the major companies in the past,that I welcome Mr.Williams interest in it should Miami also turn it down.

I trust indeed that this will clear up a misunderstanding if one should exist on the Miami contact.

Very truly yours,

  
Chas.G.Russell

Copy to.

Mr.Seton Williams.

201 N. Court St.  
Tucson, Arizona  
July 7, 1950

Mr. Chas. H. Dunning, Director  
Department of Mineral Resources  
State of Arizona  
Mineral Building, Fairgrounds  
Phoenix, Arizona

Dear Mr. Dunning:

Thank you very much for your letter of July 6th, enclosing a copy of H. N. Wolcott's report on Mr. Charles Russell's Padres-Hester Group of mining claims. I have looked over the report, and return it herewith, with thanks.

I have no intention of rushing Miami Copper's investigation of the property. Since writing you on June 26th, I have learned from Mr. Russell that Miami plans shortly to undertake a study of his area, and I do not wish to interfere with their work in any way. (Field work in the Ko Vaya Hills will be unbearably hot for the next couple of months anyhow).

Should Miami turn the prospect down without drilling, however, I am anxious to bring it to the attention of a mining company which is not yet located in Arizona, although the company has done some aggressive exploration work in the State. With this possibility in mind, I was anxious to read Wolcott's Reconnaissance Report.

Sincerely yours,

*Seton S. Williams*

Seton S. Williams

cc: Mr. Russell

July 6, 1950

Mr. Seton S. Williams  
201 North Court Street  
Tucson, Arizona

Dear Mr. Williams:

Herewith is copy of the report you wanted.

We have just recently interested the Miami Copper Company in this property and it is our understanding that they now have it under investigation. We feel sure that they will act promptly in either expressing a desire to proceed further, or will withdraw from the picture. We hope the interest you express in the property does not mean that they will be unduly rushed or forced to face a type of competition in which these large companies will not join.

Yours sincerely,

Chas. H. Dunning  
Director

Mr. Chas. H. Dunning, Director  
Department of Mineral Resources  
Minerals Building, Fairgrounds  
Phoenix, Arizona

Dear Mr. Dunning:

Yesterday I made a brief trip with Mr. Charles Russell of Tucson to his Padres-Hester copper prospect in the Ko Vaya Hills of the Papago Indian reservation (approximate location- Section 33, T 15 S, R 4 E.)

Mr. Russell informs me that Mr. Walcott wrote a report on the prospect for the Department of Mineral resources. If Walcott's report is available I would appreciate it very much, if you will forward a copy to this office. I would like to read over the report briefly, and will return it to you within three days of its arrival in Tucson.

Yours very truly,

*Seton S. Williams*

Mr. Charles G. Russell  
737 East 9th Street  
Tucson, Arizona

Dear Mr. Russell:

We are interested in finding a large prospective copper property for one of the large operators.

Some time ago Mr. Ed Sweeney brought to our attention a group of claims held by yourself near Sells, Arizona.

Do you still have this property? Is it open for negotiation and do you have any reports or detailed description of it?

Yours very truly,

Chas. H. Dunning  
Director

CHD:mh

DEPT. MINERAL RESOURCES

RECEIVED

JUN 8 1942

PHOENIX,

ARIZONA

MEMORANDUM

PADRES-HESTER  
(Gababi)

To: Director, Dept. Mineral Resources

From: George A. Ballam

This property is located  $1\frac{1}{2}$  miles west Carnahan's Trading Post, west of Sells on the Ajo highway. It is owned by Chas. Russell, 218 N. 4th Ave., Tucson.

Mr. Russell told me that he could produce a considerable tonnage of copper ore, and would if he could sell to the government. He plans on working the property this fall in any event, hoping that a local market will be established by that time.

He has submitted a mine owners report.

*George A. Ballam*

STATUS OF DORMANT MINES

MINE NAME: Padres-Hester Group, Santa Rosa Group.

LOCATION: Cababi Dist., Pima Co. Santa Rosa Dist., Pima Co.  
Owner

OWNER AND/OR LEASEE: \_\_\_\_\_

ADDRESS: 218 North 4th Ave. Tucson, Arizona.

APPROXIMATE PRODUCTION (Year of 1945):

COPPER \_\_\_\_\_ Lbs. LEAD \_\_\_\_\_ Lbs.

ZINC \_\_\_\_\_ Lbs. (OTHER) \_\_\_\_\_

CHECK THE CHIEF CAUSE OF YOUR DISCONTINUED PRODUCTION:

- (A) Easily available ore worked out.
- (B) Increased costs, but have quantity similar to past grade of ore.
- (C) Too close a margin to develop more ore.
- (D) \_\_\_\_\_

If you have ore ready to mine please give your estimate of the amount of metal (name each metal) that you could produce in one year (after allowing 60 days to get started) if there were premiums above present market prices. Name amount with a low premium, and amount at a high premium; such as:

Copper at  $22\frac{1}{2}\phi$  plus 5 $\phi$  premium..... 1,000,000 Lbs.  
Copper at  $22\frac{1}{2}\phi$  plus 10 $\phi$  premium..... 1,500,000 Lbs.

\_\_\_\_\_  
\_\_\_\_\_

If you do not have ore ready to mine please discuss the following:

- (A) Do you think a reasonable development program would produce a justified tonnage of commercial ore at above mine?

At present prices some marginal ore  
could be mined from surface

- (B) With a premium price (guaranteed for one year) could you carry out such a development program yourself? What premium?

No. Lack proper equipment  
\_\_\_\_\_

- (C) If you could not do this yourself, would a quick drilling program by some government agency (at government expense) be sufficient?

Limited drilling would either make or break  
either of the groups named

- (D) Or would you prefer a loan plan similar to the arrangements during World War II?

No

How about a combination plan in two stages such as follows?

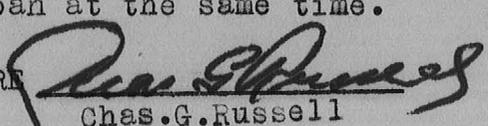

Stage 1: Government engineers review project and, if a little drilling appears to be justified and a preliminary key to the situation, such drilling program to be agreed upon by owner and government engineer, paid for by the government, but let by contract.

Stage 2: If results of drilling (or without drilling) justify underground development and/or production equipment, same to be obtainable via a mortgage loan on property.

Please discuss the above: I would definitely favor the  
combination plan suggested above reopening mines now inactive  
and for bringing in new properties which have a reasonable chance  
of making producers. Should the government engineers find  
a property that warranted, a limited drilling or other development,  
it should be done. Should this preliminary prove the property  
had reasonable merit, a loan should be made to equip, develop and  
bring it into production. However, I feel that such loans should  
SUGGESTIONS:  
be made contingent and only upon the owners willingness to  
mortgage his property for the amount of the loan and contingent  
upon his willingness to accept supervision and council until  
said loan is repaid to the government. Some adjustment of  
present tax structure would be most welcome. It might be  
difficult to pay on profits and repay a loan at the same time.  
This is just a suggestion.

DATE August 14th. 1950

SIGNATURE
