## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

---

RRB WR 9/19/80: Wallace Dunlap, 5002 W. Bethany Home Road, Space 19, Glendale, Arizona 85301, was in for information on crushing, grinding, classifying and tabling of gold ore. He has a small jaw crusher, roll crusher and ball mill mounted on a flatbed. He reported that he was in a loose partnership with George W. Morgan and a third party to operate the Stardust Mine in the Eagle Tail Mtns in Yuma and Maricopa Counties. The assayer-geologist-metallurgist for the project is Howard B. Nicholas, 5807 E. Singletree Street, Apache Junction, Arizona 85220, 982-3048 (Registered Assayer #4678).

---

George Morgan reported on a number of his properties. The Stardust Mine which may also include the Black Silver, Outlaw and Big M (he was somewhat hasty and obscure when explaining what claim groups were part of what) is being handled for exploration by a Mr. Harold Creamer who is an "Oil and Gas man" in Denver. The property(ies) is in T2S R10 & 11W.

(please note date)

---

/of Amarillo, Texas

GBG WR 2/7/69: Mr. V. B. West, President of Anozira Mining Company of Buckeye, Arizona. Mr. West said in addition to his Mica claims, he had taken into his new company a group of 30 silver claims. They are located in Sec. 5, T1 and 2S, R10W, Maricopa County, Cortez Butte Area. He also said that he expects to start his open pit mining in April or May 1969.

---

KAP WR 11/19/82: Discussed a number of precious metal targets with T.O.N. Consultants, 5400 Phoenix N.E. Suite 109, Albuquerque, N.M. 87110. They have a client who has been approached to invest in the Outlaw and Big M properties.

---

RRB WR 6/3/83 - Jack Moore, geologist with T.O.N. Consultants, 5400 Phoenix NE, Suite 109, Albuquerque, New Mexico 87110, was in to discuss the Stardust file, They are investigating it for a client.

---

NJN WR 4/18,25/86: George Morgan (c) received my letter in response to his advertised mining properties and reported that following: Mr. Morgan believes he has 5 resource zones identified on the Stardust (f) La Paz Co. He will visit us and provide more detailed information for the files.

---

---

KAP WR 8/15/80: Stan and Les Haye (Haye Brothers), Box 456, Star Route 2, Buckeye, Arizona 85326, phone 279-4742, reported they have leased a group of claims in the Big Horn Mountains. They have requested a visit to their property. (A separate report is being prepared.)

---

av. Tasted 4/12/84 JB

TO: John H. Jett, Director

FROM: Ken A. Phillips, Mineral Resource Engineer

For inclusion in Stardust Mine file.

James A. Weber, President, Palm Mining Corporation, 113 Calle Olas Altos, N.E., Albuquerque, New Mexico 87110, Ph: (505) 821-9277, reported the firm has acquired a lease on 142 claims and a state section in the Clanton Well area of the Gila Bend Mountains in Yuma and Maricopa County. In particular, work is being done in Secs. 1, 11, 12, 14 & 15, T2S, R11W, Secs. 5 & 6, T2S, R10W and Sec. 32 (State) T1S, R10W. The property project is referred to as the Morgan Property on the Gila Bend Mountains Project. The project area covers seven "old mines" which have been listed in MILS and are written up in various literature. They are:

County	MILS#	Location	Names	References
Yuma	79	Sec. 11, T2S, R11W	Bill Taft Group, AKA Little Jane Prospect, Taft Mine	ABM Bull. 192, p.151 " " 134, p.151
Yuma	80	Sec. 12, T2S R11W	Lucky Strike Prospect	ABM Bull. 192, p.151
Yuma	81	Sec. 1, T2S R11W	Camp Creek Prospect, AKA Davis Group, King of the West	ABM Bull. 192, p. 15 ABM Bull. 134, p.147
Yuma	220	Sec.10, T2S, R11W	Belle MacKeever Group	ABM Bull. 134, p.146
Yuma	221	Sec. 15, T2S, R11W	Yellow Breast Prospect	AZ DMR Card
Maricopa		Sec. 31, T1S, R10W	Anozia	AZ DMR file
Maricopa		Sec. 32, T1S, R10W	H Hand Claims H H + T	AZ DMR file
Maricopa		Sec. 5, T2S, R10W	Black Silver	AZ DMR Stardust file

A copy of a general report on the project was provided for inclusion in the Stardust Mine (file) Yuma-Maricopa Counties. The property was acquired from George W. Morgan. The claims are known as the Black Silver and the Stardust. James A Weber also heads his own consulting firm, T.O.N. Consultants of Albuquerque, New Mexico. Reference to the Morgan Property report should be made on the cards and/or in the file of the old properties listed above. Mr. Weber explained that Palm Mining Corporation has completed geologic mapping, a partial geophysical survey, taken 700 geochemical survey samples and drilled 7 holes. He feels the property has a potential 5 million tons of 0.4 gold and 8.0 silver (tr. oz/ton). Further, it has an unexplored VLF anomaly, a stock like intrusion and a possible massive sulfide target. He would like to joint venture some additional exploration work.
