Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA

FIELD ENGINEERS REPORT

Mine : Huthmacher Silver Prospect Date 10-5-62
7 miles south from Salome next to Buckeye Rd.
District Ellsworth Dist., Yuma Co. Engineer Lewis A. Smith
Subject: Interview with Leslie Huthmacher.

Mr. Huthmacher stated that he had found a vein in monzonite-porphry. The vein trends E-W, is nearly vertical, but has thus far been traced for only a short distance. It apparently follows one side of a yellow, iron-stained dike, the mineralized area ranges from 6 inches to 6 feet in width, averaging about 2 feet. A sample across the better looking part of the vein assayed \$104.00 in silver. Some scattered kernels of galena, haloed by anglesite and cerussite were seen. No notable work has yet been done. The specimens contain what appears to be embolite (Ag(Br,Cl)), cerargyrite (AgCl), and possibly a little bromyrite (AgBr). Mr. Huthmacher plans to open the vein up more during this fall. The property is now covered by 1 claim which was staked about 4 months ago.

Hothmacher Silver Prospect

7 miles S. of ...
Yuma County

Reference: Arizona Dept. of Mineral Resources

Hothmacher Silver Prospect (file)

present owner:

minerals: silver (enargite, cerargyrite, bromurite)

history of the area:

Lester Hothmacher claimed the property in 1962.

Very little work was done.

geology:

E-W trending, nearly vertical vein in a
monzonite porphyry. It follows an iron
stained dike.

property consists of 1 claim
