Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Mr. R. C. Mann, Mann Western Mining Exploration
 P. O. Box 156
 Bouse, AZ 85325

*Iron King group
 Sec 29, T7N, R17W
 Yuma Co.*

Dear Mr. Mann:

Your Notice of Intent to Conduct Mining Operations was misrouted and was just now received.

You may do your exploratory work any time after you send us your notice, since approval of exploratory or prospecting is not needed from us. A notice such as you sent is required.

If the bentonite is of drilling mud grade, the mineral is locatable. If the grade is fine enough for food filler, or other similar uses, it is saleable.

Barite (barium sulphate) also used as a drilling aid, is marketable, if it is pure enough for the processor. Much of the barite in the Bouse area is of poor quality but some good veins do exist.

We wish you success in your operation.

Sincerely,

Frank E. Daniels

F. E. Daniels, Acting Area Manager
 Lower Gila Resource Area
