Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine Lode Star Claims

Date Nov. 19, 1962

District Hartford (Huachuca) District, Cochise Co. Engineer Axel L. Johnson

Subject: Field Engineers Report. Information from James Moore, by telephone conversation.

Location In Miller Canyon, in Huachuca Mts. (Steep grade requires jeep or 4 wheel drive)

Number of Claims 10 unpatented claims in National Forest.

Owners Five Star Mining Co., 2016 E. Broadway, Tucson. (Lease with option to purchase from a Mr. Parker).

Company is composed of James F. Moore, 4171 E. Santa Barbara, Tucson
Henry J. Severyn, atty., 2016 E. Broadway, Tucson
Jeff Jepsen, Tucson, Ariz.
et. al. (2 others)

Principal Minerals Lead, Zinc, Silver, & Copper -- all sulphides.

Present Mining Activity None at present.

Geology Mr. Moore reported 3 principal veins, as follows:
(1) One vertical vein --- 8 ft. wide, (with \$ 70 ore)
(2) One inclined vein --- 8ft. to 10 ft. wide.
(3) One inclined vein --- 16 inches wide, (with \$ 105 ore)

Ore Values Mr. Moore reported the following ore values:
Lead --- 20 to 50 %
Zinc --- 0 to 25 %
Silver --- 16 to 34 oz.
Copper --- trace

Review of Recent Operations The company started work on the property last January. 2 miles of road was built at a cost of about \$ 40,000. The steep grade up the mountain to the mine still requires a jeep of 4 wheel drive to negotiate. Considerable exploration work on the 3 main veins, consisting of open cuts, trenches, and shallow shafts was also done. Mr. Moore reported that the company ran out of money, and, therefore, discontinued operations at least for the present.

Proposed Plans None mentioned.
