The following file is part of the

Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

Manganese sample.

Uranium ✓ & Mn

STATE OF ARIZONA
FIELD ENGINEERS REPORT

The property has received much attention by large companies at various times in the past and in 1917 it was the subject of an intensive promotion campaign (as the "Cleopatra Copper & Gold Mining Company") with claimed gross value of ore in sight of \$35 to 40 million. It is said that 44 diamond drill holes were put down many years ago but no data re the findings are available. The ore is a mixture of oxide and sulphide.

LUCKY STRIKE MINE

MOHAVE COUNTY

Drilled to 1,005' with mineralization (CuS) at 795' - 854' and suspended for the season.
