Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

MDC CLAIMS

GILA COUNTY

KAP WR 12/31/87: Del Hana (card) was in for information on avoiding typical cyanide leaching problems. He along with a Mr. Cindrigh, P O Box 552, Roosevelt, Arizona 85545 are planning a small gravity and cyanide mill on the MDC Claims in the central part of the S $\frac{1}{2}$, T3N R14E Gila County. The mill will consist of a jaw crusher, set of rolls, simplex jig, ball mill with classifier, and a agitated vat leach using cyanide. The Claims are the MDC #1 through #8 (AMC 265026). Mr. Cindrigh owns numbers 1-4 and Del Hana reports he owns numbers 5-8. They may be attempting to use the small mill to prove the gold ore deposit. The property can be reached from Globe by traveling north on State Highway 88, then taking 288 north toward Young from its junction with 88. The plant is a short distance east of the highway via the first road to the east north of the junction. This should be a new file and AZMILS listing.
