## **ACCESS STATEMENT**

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

## **CONSTRAINTS STATEMENT**

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

## **QUALITY STATEMENT**

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

FIELD ENGINEERS REPORT

Mine Machulies Tuff

Date April 25, 1963

District Humbug Dist., Yavapai Co.

Engineer Lewis A. Smith

Subject: Interview with John Machulies, 920 W. Indian School Rd., Phoenix

Location: South of Champie Ranch and N of Castle Hot Springs in very rough country (no road to property).

Material: Tuff

Property: No claim. Machulies was undecided as to whether he wished to locate it, but plans to study the accessibility of the locality to see if a reasonable cheap access road could be put into the deposit.

Geology: A bed of white tuff, 20 feet thick, and of considerable lateral extent.

Mr. Arthur Flagg, according to Machulies, pronounced it as very good tuff, but its location and the market conditions at that time, did not warrant trying to open it up further, so that it has not been claimed.
