Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ADMMR MEMORY LANE GROUP FILE

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine Memory Lane Group Date May 23, 1940
District Old Hat Mining District Engineer Newton Wolcott

Subject:

Location: Approximately 6 miles SE of Oracle on Mt. Lemmon Highway. (Pinal County)

Owner: A. C. Meisenbach

Address: Oracle, Arizona.

Principal Metals: Gold and silver

Operations: Present: Property not operating at present.

Operations Planned: Additional development work.

Number Claims, Title, etc.: Four unpatented claims on Forest Reserve.

Description: Topog. & Geog.: Low, rolling foothills at north end of Santa Catalina Mountains. Gentle slopes and shallow washes. Vegetation sparse, mostly low brush and cactus. Elevation approximately 4500 feet above sea level.

Mine Workings: Amt. & Condition: Two vertical shafts 25 feet in depth. Not timbered, but open & accessible. One inclined shaft approximately 30 feet in depth, partially caved but can be entered. Various shallow pits and open cuts.

Geology & Mineralization: The predominating country rocks on the ground covered by these claims are garnite and diorite, both of which are cut in places by diabase dykes. The ore is found in a series of quartz veins which have a NW-SE strike and variable dips to the NE. Galena and pyrite may be observed in various specimens, and gold and silver values are associated with both of these sulphides. Gold values are also found in the hematite which appears in considerable quantities at places in the upper oxidized portions of some of the veins. There has evidently been some almost horizontal shearing in this area, as the owner states that one of the most prominent veins has been cut off at a depth of approximately 25 feet. No work has been done toward attempting to pick up the faulted portion by cross-cutting at greater depth.

Ore: Positive & Probable, Ore Dumps, Tailings: There is ore exposed at various points on the property; but there is not sufficient development work done to allow any estimate as to possible tonnage or grade.

Mine, Mill Equipment & Flow Sheet: No equipment of any sort on the property.

Road Conditions, Route: The Oracle-Mt. Lemmon highway runs directly through a portion of the property, and almost any point on the ground is easily accessible by car or truck.

Water Supply: No attempt has been made to develop a water supply as yet.

Brief History: Like other properties in this district, this one has been worked sporadically for many years by pocket hunters and high-graders; and while it is known that ore has been shipped from the ground, there is no record of any sort to show the tonnage or the grade of the material shipped.

Special Problems, Reports Filed: No reports available.

Remarks: Property easily accessible for inspection and sampling.

If property for sale: Price, terms, and address to negotiate: Property is for sale.
Communicate with owner for price and terms.

(Signed) Newton Wolcott
