ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

PRESIDENT'S LETTER TO SHAREHOLDERS

1987 proved a significant year for the company. Five of Can-Ex's gold properties in S.W. Arizona have been optioned to Billiton Minerals (U.S.A.), Inc., who are currently active in the exploration of these properties. In addition, the company has secured an option to purchase the Socorro Reef Gold Mine and surrounding area. Initial sampling and geologic results have indicated the presence of a large and rich gold and silver bearing formation. Exploration of this area is continuing.

The company has ample funds to conduct its programs. 1988 promises to be an exciting and rewarding year for Can-Ex.

On Behalf of the Board
CAN-EX RESOURCES LTD.

1. MINERAL PROPERTIES AND DEVELOPMENT

(a) Mineral claims and options

The Company's mineral claims and options consist of the following Arizona and British Columbia properties. Substantially all of the costs incurred to date relate to the Arizona properties.

Arizona properties

Gold Crown prospect

This gold prospect, consists of 10 contiguous mining claims, located in the Big Horn District, Maricopa County, Arizona, U.S.A., and comprises the Gold Crown and Gold Crown Nos. 1 - 9 claims. The property is situated some 20 kilometres south of Aguila, a small village approximately 100 kilometres west of Phoenix on Highway 60.

Pump prospect

This gold prospect consisting of 18 contiguous mining claims is located in the Big Horn District, Maricopa County, Arizona, U.S.A., and comprises the Pump Mine, Pump Mine 1 - 6, and Pump 1 - 11 claims. The property is situated 24 kilometres south of Aguila, Arizona.

Overshot prospect

This property consists of 8 contiguous mining claims located in the Ellsworth Mining Division, La Paz County, Arizona, U.S.A., known as the Overshot and Overshot 2 - 8 claims. The property is a gold prospect situated approximately 15 kilometres south of Salome adjacent to the old Harquahala Mine.

Gold Hill West prospect

This gold prospect consists of 30 mining claims located in the Ellsworth Mining District, La Paz County, Arizona, U.S.A., comprising the Gold Hill West 1 - 8, Gold Hill West 18A through 28A and 30A to 40A. The property is situated some 12 kilometres southeast of Salome, Arizona.

Big Horn property

This gold property consists of 107 full sized and fractional federal lode mining claims and one federal placer mining claim in the Big Horn District, Maricopa County, Arizona, U.S.A. The property was acquired in three separate parcels known as the Mollie D which comprises 71 claims, the Knabe which comprises 23 claims, and the El Tigre which comprises 14 claims. The property is situated approximately 24 kilometres south of Aguila, Arizona.

CAN-EX RESOURCES LTD.

The Company has also agreed to issue up to 75,000 shares of the Company to the optionors of the Knabe parcel (see note 3(i)).

CAN-EX RESOURCES LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2. RELATED PARTY TRANSACTIONS (Continued)

(b) Property acquisitions (Continued)

On April 14, 1986, the Company acquired an option to purchase the Mollie D claim parcel of the Big Horn property through the assignment of Tri-Con's interest in an option agreement. The Company has agreed to pay to Tri-Con a net smelter return royalty of 5% effective on payment of the purchase price of \$500,000 U.S. to the former property owner. The purchase price is payable by way of the greater of monthly payments of \$500 U.S. and a 7% net smelter return royalty.

(c) Payable to (receivable from) related parties - current

	<u>1987</u>	<u>1986</u>
Tri-Con Mining Ltd. Open account	\$(264,449)	\$(113,694)

	<u>\$ 5,549</u>	<u>\$ 91,709</u>

The open account with Tri-Con Mining Ltd. and the payable to Tri-Con Mining (Arizona), Inc. bear interest at bank prime.

On March 21, 1986, the Company issued 1,000,000 shares at a price of \$0.20 per share to Tri-Con Mining Ltd. in settlement of \$200,000 of the Company's current liabilities. Tri-Con Mining Ltd. also forgave debt owed by the Company totalling \$188,973.

(d) Payable to related parties - long-term

	<u>1987</u>	<u>1986</u>
Tri-Con Mining Ltd. Property purchase	<u>\$111,018</u>	<u>\$111,018</u>

The amount payable to Tri-Con Mining Ltd. with respect to the property purchase is non-interest bearing.

6. SUBSEQUENT EVENT (Continued)

(b) Granting of option

On January 25, 1988, the Company granted a three-year option to an independent third party to purchase an 80% undivided interest in its Gold Hill West prospect, Gold Hill East prospect and Big Horn property. Under the terms of the agreement, the Company will receive \$50,000 U.S. upon approval of the agreement by regulatory authorities. The option is exercisable for a three-year period and if exercised will result in payment of \$500,000 U.S. to the Company. The agreement will reduce the Company's future option payments by \$30,000 U.S. and minimum work commitments by \$16,700 U.S. in each of the next three years and all of the Company's committed annual contingent payments on these properties except for 5% of net smelter returns in respect of the Mollie D parcel (notes 1(a) and 6(a)).

DEPT. OF MINES &
MINERAL RESOURCES

PRESS RELEASE

- CAN-EX REGAINS 100% OWNERSHIP OF ARIZONA -
GOLD PROPERTIES
- DRILL INDICATES INCREASED TONNAGES AND GRADES -

The company has recently recaptured a 100% interest in its S.W. Arizona gold properties by their return from Billiton Minerals, U.S.A., Inc. Prior work done by Can-Ex as well as drilling performed by Billiton on the El Tigre property has increased potential ore reserves to approximately 50,000 tons of 0.1 to 0.3 ounces of gold per ton. This would equate to some 5,000 to 15,000 ounces of gold. Drilling by Billiton intersected a flat lying zone with assays as high as 0.51 ounces of gold per ton across ten feet. The zone of interest is open to extension.

Also, Billiton's work on the Knabe and Molly D properties identified geophysical and geological targets, from which the drainage has been placer gold mined to bedrock. These areas therefore become prime drilling targets for in place gold mineralization. The company will continue accumulating and interpreting this incoming data before formulating an on-going program.

SOCORRO REEF PROGRAM

The recently acquired Socorro Reef Property has yielded good results in the first phase of drilling by extending a gold bearing surface zone to a depth of 200 feet (limit of drilling). The over all vertical extent is now in excess of 300 feet and a strike length of some 250 feet has been studied in detail, with 1500 feet of the zone being identified by prospecting and channel sampling. The drill results have shown a vertical system of approximately 5 to 15 feet in width with grades ranging from 0.01 to 0.43 ounces of gold per ton. Surface sampling of this zone disclosed 10 to 20 foot widths with grades ranging from 0.01 to 1.73 ounces of gold per ton.

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

MANGANESE SURVEY

Holt Copy

Mine MOLLY DAVENPORT NO. 5.

Date June 24, 1942.

District Vulture Dist., Maricopa Co.

Engineer Elgin B. Holt

Subject:

BRIEF REPORT

✓
OWNER: W. H. Davenport, Aguila, Arizona.

METALS: Manganese: Psilomelane, manganite, pyrolusite. Calcite is also a constituent of the ore.

LOCATION: This property is located around 22 miles south from Aguila, Arizona, and one mile westerly from the Victory claims. It is reached by a desert road from Aguila.

GEOLOGY, VEIN, DEVELOPMENT WORK: The vein crops out along the flank of an andesite ridge. Strike of vein NW to SE; dip 80 degrees NE. A shaft has been sunk on vein to a depth of 22 feet and some ore was removed and shipped years ago; but the tonnage and grade of this ore is not available. Neither could the owner furnish any data concerning assay values of the ore, except that one selected sample assayed 49.8 per cent manganese. Some ore is found in vein outcrop for a length of 400 feet on surface; but further work would be needed to determine whether this prospect is of any commercial importance or not. One thing in favor of this claim is that the vein is a true fissure from 3 to 4 feet wide, with manganese ore of unknown grade showing in the said shaft and croppings. However, the vein is not large, so the property could not be considered an important source for manganese ore for any custom plant.
