ANNOUNCEMENT

OF THE

Red Mountain Copper Mining Co.

The affairs of the company will be in the hands of a board of five directors, at least three of whom will be experienced mining men. I am the President and General Manager of this Company. I will supervise the finances and have charge of the active development work and will attend to shipping the ore, and will be on the ground. I shall have a competent Superintendent under me.

50,000 shares of this Stock is offered to the Public. Some of it is already subscribed for. There is to be no discrimination. The price is \$1.00 per share to everybody that gets any of it. The way to get it has already been described. I cannot and do not desire any one to assume that I guarantee anything regarding the future value of the stock. I am putting my own money in it. That shows my confidence. I will guarantee that the money shall be spent on the property quickly and in a business and miner-like manner, and in a way that will be most beneficial to the stockholders. I consider the proposition a good One, and I can conscientiously invite my friends to take a chance with me.

If We Get a Second Lowell or Verde Extension it Would be Hard to Figure the Profits. If it's a failure You will have the satisfaction of knowing you had a fair, good run for your money. I can say we have good ore and plenty of it to start on. We don't have to sink a deep shaft to get it. I feel sure that the values will increase rapidly with depth. There should be quick action. I hope six months will tell the tale and put the property paying good dividends.

The officers of the company are: F. C. Fenner, president and general manager; Edward J. Jackson, vice-president, Safford, Arizona; J. C. Gung'l, secretary and treasurer, Willcox, Arizona; C. L. Jones, director and superintendent, Bisbee, Arizona; A. G. Smith, director, Benson, Arizona.

Make all remittances payable to the Willcox Bank & Trust Co., with instructions to procure the stock for you from the Red Mountain Copper Mining Co.

I have personally paid all expenses up to date. The proposition starts off free and clear of any debt. I now ask you to take a chance with me. I expect to deliver the goods.

F. C. FENNER, Willcox, Arizona,
Formerly General Manager Lowell Mine,
Bisbee, Arizona.

BY

F. C. FENNER

Formerly General Manager of the Lowell
Mines, Bisbee, Arizona

ANNOUNCEMENT

Ever since last March, 1916, I have been endeavoring to effect a consolidation of mining interests in the Pinaleno Mountains northeast of Willcox. The consolidation has now been effected and a company formed to handle these properties.

There are Forty-eight Claims all deeded to the Company

The property is entirely paid for, but is not yet patented. All work has been done up to date and the titles as they exist are perfectly good. There are several mining men who have spent considerable time on the property besides myself. Their opinion is that the property offers great possibilities with proper development.

I have been on the ground personally for about 90 days. The property lies about 20 miles north of Willcox, on the westerly slope of the Pinaleno Mountains just east of the Hays ranch. There is a good road leading to it and an automobile can be driven right onto the ground.

There are five groups of claims involved, all of which have been surveyed, properly monumented and staked by 4x4 posts painted white. All assessments and discovery work has been properly done. The claims are in Graham County and the location notices and other papers are recorded at Safford, Arizona.

Shipping Ore in Sight

The ores are rather evenly distributed through a large mass of porphyry. At some places a concentration of values exists along the fracture planes of the rocks and along a very large intrusive dyke that cuts through the property in a northeasterly by southwesterly direction. These concentrated zones afford some ore of high grade which will pay well to ship by wagon and rail to the smelters. There are quantities of low grade ore on the surface but very little work has been done on any of it, the deepest shaft being thirty feet ALL IN ORE.

It has been estimated that about \$30,000 spent on the property would put it on a permanent paying basis.

However, I am of the opinion that it is better to provide a working capital of \$50,000 to fully insure the success of the proposition. A company has been incorporated under the laws of Arizona, and permits have been secured from

the Arizona Corporation Commission permitting the company to sell 50,000 shares of its Treasury Stock at its par value, which is \$1.00 per share, therefore this stock will be issued full paid and non-assessable.

The Company has been named The

Red Mountain Copper Mining Company

and their articles of incorporation permit them to carry on a general mining business. The townsite and water rights have been secured and belong to the company. Their charter also permits them to carry on a General Merchandise Business in connection with their mines.

This company has now for sale to anyone who cares to buy 50,000 shares of its stock, and the price is \$1.00 per share.

In order to protect the purchaser, as well as the seller this

Stock can only be secured under certain conditions

The company does not employ any stock salesmen or pay any commissions for selling stock. This is ONE company that is going to spend ALL the money the stock sells for in the ground and on intelligent development work.

Arrangements have been made with the following banks for the transmission of money to us and in returning the stock to the purchasers: Willcox Bank & Trust Co., Willcox, Arizona; Gila Valley Bank & Trust Co., of Safford, Arizona; The Bank of Bisbee, of Bisbee, Arizona; and The Miners and Merchants Bank of Bisbee, Arizona.

Money can be deposited in any of these banks with instructions to forward same to The Willcox Bank & Trust Co., at Willcox; and to request the Willcox Bank to secure the stock involved in the transaction from the office of the Red Mountain Copper Mining Co. All stock will be issued from the office of the company in Willcox.

All stock issued will be returned to purchasers through banks. This arrangement insures both the stock and the money reaching the right place. The least number of shares that can be purchased is Ten. The largest number that can be purchased by one person is 5000, the intent of the company being that The Small Investor Shall have a Chance to Make Some Money as well as the man of large means.
