ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

100-2-10/13/40
Dear Sir

I've just been looking over Ray Dirt and ran over your blind add and thought I would answer it as I've such a property but it is situated 12 miles from a road and I've got quite a bit of copper and Gold showing on it one place there is 12 in of Sulphide that runs 22 per cent and 4 dollars gold. and there is one showing that runs 12.88 gold and is 24 in wide and is free milling and there is generally water in the creek that erases the claims and a fine sight for a reservoir on the creek I've been trying to get the U.S. M.O.A Engineer to come out and give me a report on it but he says he is too busy at present.

it is located in the old est Schist known and there is strong showing for over 1500 feet on surface of copper and gold if you feel like ours this you can reach

me at Globe in care of the
United Drug & Music Co

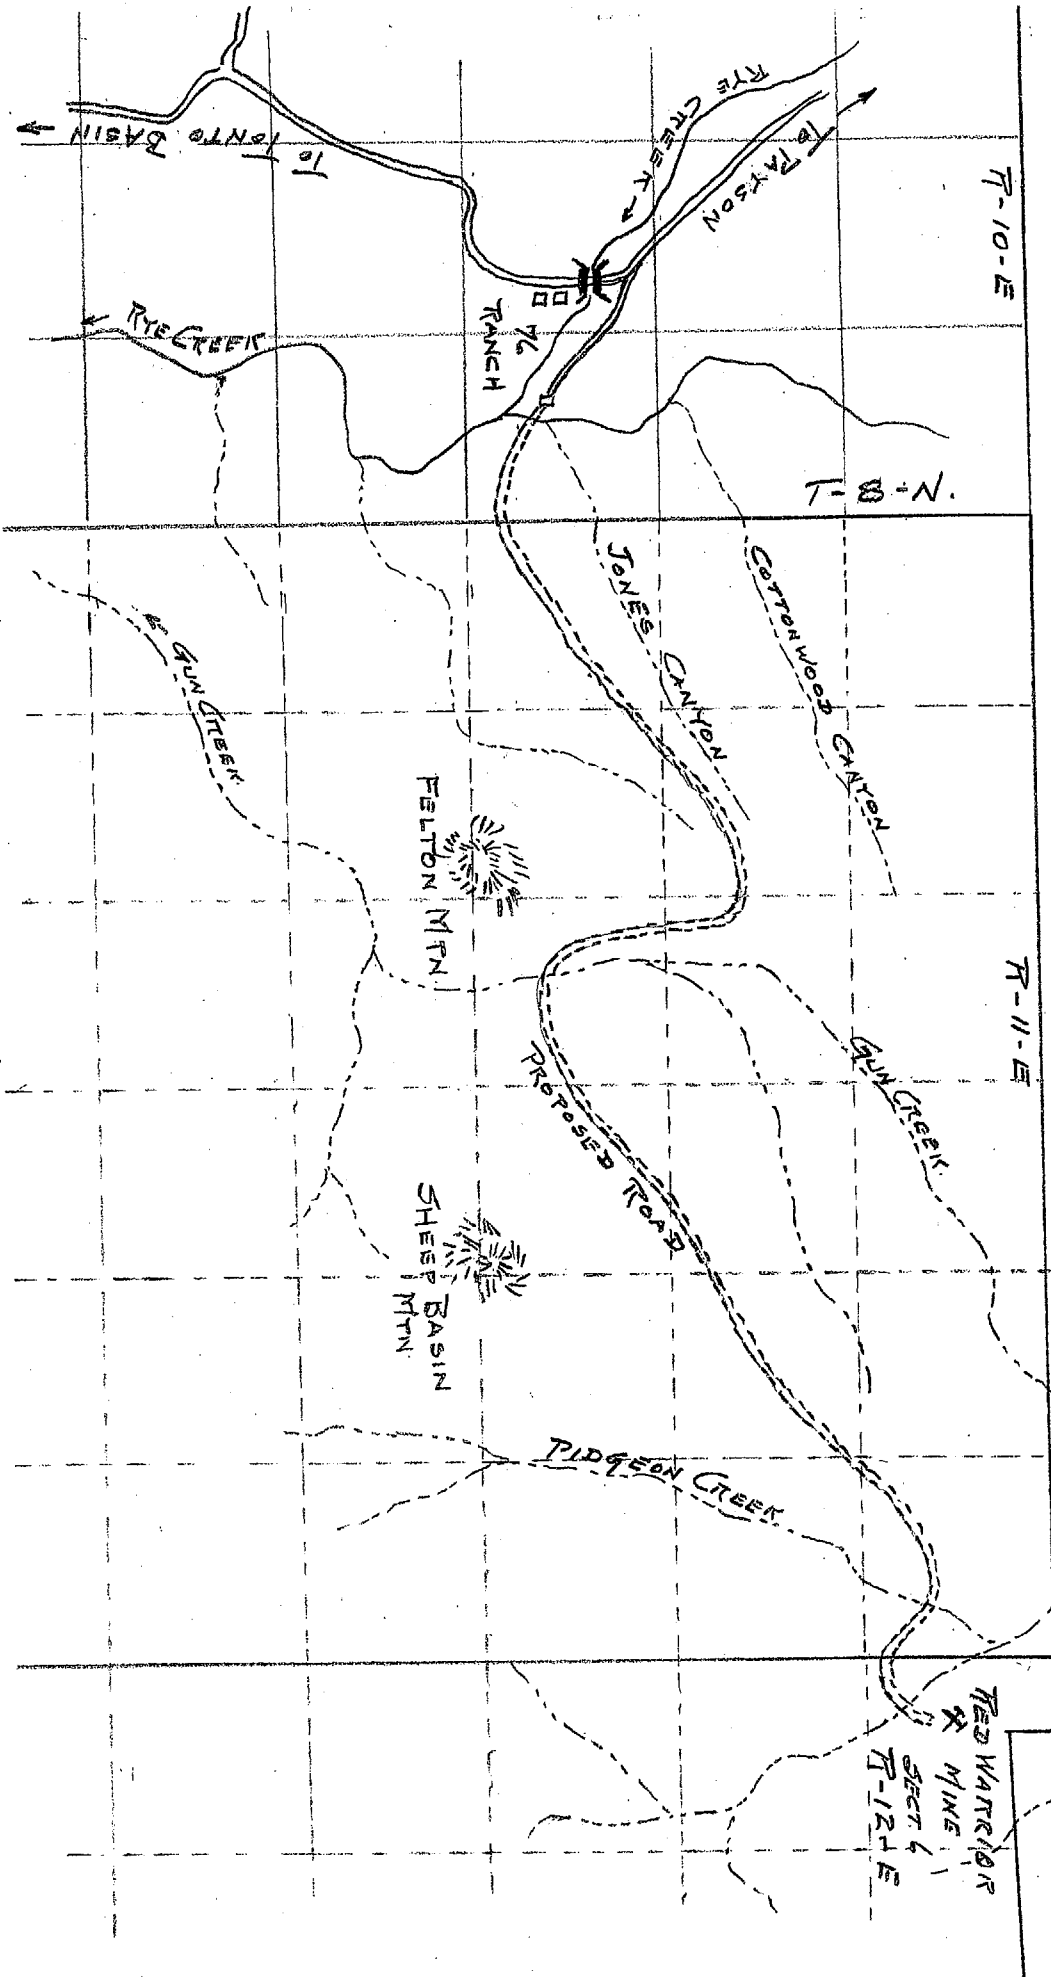

W. P. Greer

for Sale or lease I am
short on capital if I could put
a 25 ton mill on property I would
not part with it

Mr. Bill Greer
Globe, Arizona

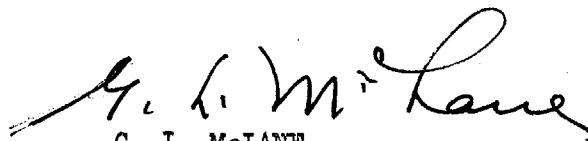

Dear Mr. Greer:

Receipt is acknowledged of a partially completed copy of Form PR DA 3, Application for Access Road to a mine in T 8 N, R 12 E, Gila County.

Please complete and sign two copies of the PR DA 3 forms, and furnish a map showing the location of the mine and proposed access road.

Additional information regarding the road should be furnished on the attached mimeographed forms prepared by the Grazing Service.

Very truly yours,

G. L. McLANE
Senior Highway Engineer

APPLICATION FOR
ACCESS ROAD TO RAW MATERIAL

Date 12/27/43

Project No. _____
(Leave blank)

Serial No. _____
(Leave blank)

Attention: Mr. G. L. McLane, Senior Highway Engineer
Public Roads Administration
P. O. Box 70
Phoenix, Arizona

TO THE PUBLIC ROADS ADMINISTRATION:

We, the undersigned, hereby make application for access road assistance to serve our property which we believe is essential to the war effort.

We agree to furnish two copies of this application, properly filled out, together with two copies of a map showing the location of the property and the road in question. We will also furnish any other information about this project upon request.

We understand that this application is to be filed with the District Engineer of the Public Roads Administration (whose name is given on this application) in the district where the property is located.

We further agree to furnish any additional right-of-way necessary for the proposed road on property owned by the applicant.

6. Address (Owner) Globe, Arizona
7. Operator W. P. Green
8. Address (Operator)
9. President
10. Gen. Mgr.
11. Mine Supt.
12. Mill Supt.
13. Principal Metals Copper, Gold
14. Men Employed
15. Production Rate
16. Mill: Type & Cap.
17. Power: Amt. & Type
18. Operations: Present Inactive at present

19. Operations Planned Further development and will later, if justified. I intend to run tunnel in to cut ledge at 250 inxx depth as it is 320 ft in at present and I dont think I will go over 50 ft. to cut it as I've learned that there is a drift at the bottom of the 185 ft. shaft to the east and that it caved and then run this drift in to cut the ledge and one of them got into a missed hole and died and the other one was missing soon after and his skeleton was found 3 years ago. I've put collar in shaft clear to 150 and have been the crosscuts that far and the ore 24 in. wide and about 2 ft. so. of shaft to that depth.

20. Number Claims, Title, etc. Six unpatented - on forest

21. Description: Topography & Geography Rather rough country about 4,000 ft. elevation - brush and some small timber

22. Mine Workings: Amt. & Condition

1 shaft - approx. 180' deep

1 shaft - approx. 50' deep

Approx. 700' of drifts, crosscuts, etc.

Various shall w workings

Shafts not accessible without repairs.

23. Geology & Mineralization Quartz veins in schist. Copper chalcopyrite and red oxide -
gold occurs free and also in sulphides
24. Ore: Positive & Probable, Ore Dumps, Tailings Approximately 25 tons of copper are broken.
Sulphide streak about one foot wide
Copper assays 22% and gold \$4.00
- 24-A Vein Width, Length, Value, etc.
25. Mine, Mill Equipment & Flow Sheet
26. Road Conditions, Route Trail for about 15 miles from Globe-Payson Highway could be made
in to a road - but expensive
27. Water Supply Only domestic supply developed. There could be a fine reservoir.
The canyon boxes up so you can make dam 75 ft. high about 300 ft. south side
line of claims and Gun Creek runs most of the time and should be worlds of water
28. Brief History Property located and worked in early days. Ore treated in arrastras on
ground.
29. Special Problems, Reports Filed Transportation - also money to develop
30. Remarks The schist is the oldest known and the ore shute are vertical and
I will cut the this summer if possible as the ore is in chimneys
31. If property for sale: Price, terms and address to negotiate.
For sale. Communicate with owner for terms
32. Signed...../sd/ W.P. Greer.....
33. Use additional sheets if necessary.
