Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

ADMMR RHOADS CLAIM FILE

DEPARTMENT OF MINERAL RESOURCES

STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine \ Rhoads Claim

Date January 10, 1961

District Quijotoa District, Pima County

Engineer Lewis A. Smith

Subject: Visited with Fred Rhoads - 1-10-61

Claims: 1 unpatented

Location: On north edge of the village of Quijotoa (Covered Wells).

Owner: \ Fred Rhoads, Quijotoa, Arizona

Work: A short adit was driven (10 feet) at the end of a cut along a fault zone.

Minerals: \ Copper and a little gold and silver.

Geology: The area consists of a series of andesite flows which form a shallow cap over granite and schist. The workings are in the andesite along a fault zone which trends NE-SW and is flat dipping (50°) to the southwest. The mineralization consists of chrysocolla, azurite, and some cuprite (?) in the fractures of the shattered andesite. The mineral zone is about 2 feet wide. Mr. Rhoads states that assays ranged from 5 to 12% copper.
