Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine **ROCKY HILL GROUP** Date **July 12, 1957**

District **Owens** Engineer **B. J. Squire**

Subject:

The property is 4 miles west of U.S. Highway 93 on the Signal Road, 1½ miles east of Bland's ranch. It is an old property that was relocated in 1956 by Robert T. Evans of Wickieup.

The country rock is granite-gneiss. The vein is a shear zone carrying quartz, lead, zinc, silver and gold. It is about three feet wide, strikes N 10°E and dips 80°W.

Ore shows cerrusite, oxidized zinc minerals and chalcopryrite casts. Grade is unknown. Some manganese stain is evident.

There are several shallow shafts on the property and some short drifts. The original work was done many years ago.
