Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

This property inactive.

MARK GIBBELL

DEPARTMENT OF MINERAL RESOURCES
STATE OF ARIZONA
FIELD ENGINEERS REPORT

Mine Roosevelt

Date Dec 10th 1948.

District Copper Basin

Engineer A. C. Nebeker

Subject: Report of Operations.

The Roosevelt mine consisting of 6 mining claims is located 6 miles north east of Skullvalley, in Copper Basin District.

Roads to the property by going in byway of Skullvalley are good. To get to the mine, cross the railroad at Skullvalley and take the road as if going to the Boston-Arizona follow the wash almost to the Boston mine then turn to the left and follow road to mine.

The topography is not very rough but is cut by several gulches which level off near the mine. The geology consists of schist and granite cut by a quartz fissure with a N 40 degree E strike, dip 80 degrees having one wall of schist and other granite. The fissure filling is a ~~white~~ white quartz from 18 inches to three feet thick.

The values in the quartz is running from \$4.00 to \$40.00 in gold, no other metal showing.

The fissure has been exposed on the strike by trenching and shallow holes for a distance of 500 feet.

A two compartment shaft is now being sunk on the vein. This shaft is down 30 feet and still in the vein. Some of the quartz is being saved from the shaft muck.

The property is owned by Messrs Albert Pessin and Allen Alper who work at the property with four other men, directed by Ed. Stone.

The boys are working with rented machinery. They are just feeling their way, to see what luck they have before buying a plant.

So Far a prospect.
