Pearce Hill

Huddy Hill

Metat Hill

Six Mile Hill

EXPLANATION

DESCRIPTION OF ROCK UNITS

- Qal — Quaternary alluvium.
- Tvt — Tertiary vesicular tuff – grey to white porphyritic rhyolite vesicular tuff.
- Ta — Tertiary andesite – grey to black fine grained equigranular andesite.
- Trp — Tertiary rhyolite porphyry – white to grey rhyolite porphyry flow with fine grained groundmass and 15% quartz and feldspar phenocrysts.
- Tvc — Tertiary volcanic agglomerate – brown to grey to red volcanoclastic agglomerate with fragments up to 4" in size.
- Trt — Tertiary rhyolite tuff – grey to red rhyolite tuff with ares from 10% quartz and feldspar phenocrysts and up to 20% fragments.
- Thp — Tertiary hornblende porphyry – grey to brown andesite porphyry with hornblende phenocrysts up to 1 cm. in size.
- Tat — Tertiary andesite tuff – brown andesite tuff with small phenocrysts of pyroxene and feldspar in fine grained groundmass.
- Trbx — Tertiary rhyolite breccia – white rhyolite breccia with minority andesitic volcanic fragments and 10% quartz and feldspar phenocrysts.
- Tap — Tertiary andesite porphyry – brown andesite porphyry with 10% feldspar phenocrysts.
- Kb — Cretaceous Bisbee Formation – medium grained white to green sandstone.

DESCRIPTION OF MAP SYMBOLS

- Contact (dashed where inferred)
- Quartz - calcite vein showing dip
- Fault showing dip and/or displacement
- Outcrop
- Outcrop with pervasive quartz veining graphically showing density
- Brecciation
- Joints with dip
- Strike & dip of bedding or flow banding
- DH-1 Diamond drill hole
- Adit with dump
- Shaft
- Prospect
- Trench
- Cave inn - Commonwealth pit & glory hole
- Sample location & number

T. 18 S. — R. 25 E.

NOTE: INFORMATION ON THIS SHEET IS FROM AN UNCONTROLLED AERIAL PHOTOGRAPH. LOCATION APPROXIMATE.
