

vein rather indistinct. Some fissuring but I could see no vein matter.

This x cut does not cut malleys. There is clay matrix and Spec. 475.

smoothly calcite. Rock out on
B. Shaft
Partially all of calcite. Mostly white
Same as x-cut
along dip. but there is
calcite near end of x-cut.
Vein has a dispersed stringer
zone. Crosscut might be considered
as all in vein material
all rock of x-cut altered
& contains stringers

Ab. 15' quartz + calcite. All rock in
x-cuts might be called vein zone.
Carries stringers.
