

$$\frac{\text{Grade} \times \text{Thickness} \times \text{No. of Intervals} \times 1000}{4}$$

- < 10,000
- 10,000 - 25,000
- 25,000 - 50,000
- 50,000 - 100,000
- 100,000 - 200,000
- > 200,000

Cutoff is 0.02 oz/ton Au

To correct,
 All values
 had to be
 divided by:
 (1000 x No. of intervals)
