

Proposed D.D.H. - not drilled as of this compilation.

Note of caution: Hole ~30° to strike of 800-level geology and therefore runs the risk of deflecting off the chert and staying in diorite.

### U.V.X. Drill Section

809 D.D.S. - ~~165°~~

Looking S75°W, Drilling S15°E (165°)

1"=40' Don White May 28, 1987

Collared 5-29-87 at 170° to barren chance of deflection
