Shaft

Old pipes in filled raise to 1100(?)

Tarnait for ears when mucking

100' to tight cave

Tight cave (To be opened enough to see whether 901-S is open)

End of rail, July, 1987 at high muck pile, with old steel sets, rail + pipe mixed in to contund mucking.

High caves

901-S

Thin drift possibly open

902-W

Area in crosscut 901-S is caved. Heavy ground. Ribs.

To be opened from "900" on crosscut

Tight cave

1102-1R ore pass to 1100 level

Don Whites proposed drift

Possible stocking disposal of waste if open.

Tight cave

Proposed linkage to M-3 zone for ventilation, haulage etc.

Possibly open in chert

Upper Sequence Volcanics
