EXPLANATION

- Recent Cover
 - Tertiary Rhyolite Porphyry Dike.
 - "Speckled" Rhyolite.
 - Andesite (ch. is strongly chloritic).
 - Andesite Porphyry.
 - Quartz-Mica Schist (wt. & dense).
 - Hornblende-Feldspar Porphyry.
 - Quartz Porphyry.
 - Iron Formation.
 - Quartz-Biotite-Epidote Rock.
 - Quartz-Hornblend Rock.
 - Dense Silicious Rhyolite.
 - Fault.
 - Strike & Dip of Schistosity.
 - Strike & Dip of Contacts.
 - Survey Station.
 - Underground Workings
 - Gossan after massive sulphides.
 - Copper oxides.
 - Proposed Diamond Drill Hole.
- Notes:
 1) Roads completed to all drill sites.
 2) Contours on arbitrary datum.
