

EXPLANATION

- ▲ outcrops of Principal manganese beds
- | Tunnel
- x Pit
- Diamond-drill hole, showing thickness and average content of beds sampled (shown in %) and total thickness of manganese beds cut (shown in ft.)
- Limits of area of potential ore as thus far prospected to April 1939.
- Apparent limits of area underlain by "hard ore"

Author's interpretation of 100% manganese content of beds sampled (shown in %) and total thickness of manganese beds cut (shown in ft.)

May hit T.B. if not may be expected to hit close to 8% possibility under.
