

EXPLANATION

Magnetic contours showing total intensity magnetic field of the earth in gamma relative to magnetic datum.

Number in circles are values of total magnetic field in gamma above the datum.

Location of measured maximum of magnetic intensity within closed flight or closed line.

Flight path (shown by dots and number of dots).

NOTE

All magnetic data are corrected and contoured using a computer for various ground magnetic anomalies. Some of the points are within the contour lines. In some magnetic requirements may occur slight irregularities between points in an aeromagnetic line, which would be more obvious than on the magnetic field. This is due to the fact that the magnetic field is not uniform in the area and the magnetic field is not uniform in the area.
