Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

SAN FRANCISCO MINE

MOHAVE COUNTY
Cedar Valley District
T16N R15W Sec 3 & 10

NJN WR 1/20/84: Joe Bardswich with Jorniex Mining (c) visited and reported that the owner of the San Fransisco Mine, Cedar Valley District, Mohave County has shown him an old long section of the undergeround workings. Mr. Bardswich plans on examining the property soon.

from: W.H. Crutchfield Jr. Mohave County Prospect Assessment Compilation (post 1982)

Name of Mine or Prospect: San Francisco Mine	Township 16N	Range 15W	Section 10 aba	Priority C
Principal Minerals: Gold, Silver	1:250,000 Quad Prescott		7.5' - 15' Quad Beecher Canyon	
Associated Minerals: Quartz	District Cedar Valley		Principal Product Gold, Silver	
Type of Operation: Underground: Tunnels, Shafts	County Mohave	State Arizona	Type of Deposit Vein	

Ownership or Controlling Interest:
Consult current assessment records.

Access: From Wikieup, AZ, proceed west on light duty road for 6 miles. Turn right on unimproved road for 5 miles, bear left on jeep trail and proceed 2.5 miles. Mine is shown on topographic quadrangle.

Structural Control or Geological Association:
"Older Precambrian Age; granite gneiss."²

Host rock is Precambrian, medium- to coarse-grained porphyritic quartz monzonite with gneissic foliation. Mineralization appears to be associated with silicification and quartz veining along narrow fault zones. A small, apparently unsuccessful heap leach operation is evident at the lower mine workings.³ It appears that this heap leach operation involved reworking of old mine dumps.

Age of Mineralization:

Production History	Geochemical Analyses
Patented claim (1) Bk #203 MS #1810	Extensive underground assay data. ¹
