Arizona Department of Mines and Mineral Resources Mining Collection

ACCESS STATEMENT

These digitized collections are accessible for purposes of education and research. We have indicated what we know about copyright and rights of privacy, publicity, or trademark. Due to the nature of archival collections, we are not always able to identify this information. We are eager to hear from any rights owners, so that we may obtain accurate information. Upon request, we will remove material from public view while we address a rights issue.

CONSTRAINTS STATEMENT

The Arizona Geological Survey does not claim to control all rights for all materials in its collection. These rights include, but are not limited to: copyright, privacy rights, and cultural protection rights. The User hereby assumes all responsibility for obtaining any rights to use the material in excess of "fair use."

The Survey makes no intellectual property claims to the products created by individual authors in the manuscript collections, except when the author deeded those rights to the Survey or when those authors were employed by the State of Arizona and created intellectual products as a function of their official duties. The Survey does maintain property rights to the physical and digital representations of the works.

QUALITY STATEMENT

The Arizona Geological Survey is not responsible for the accuracy of the records, information, or opinions that may be contained in the files. The Survey collects, catalogs, and archives data on mineral properties regardless of its views of the veracity or accuracy of those data.

FIELD ENGINEERS REPORT

Mine Shamrock Mine (5 claims). Date Feb. 13, 1940.

District La Paz, Yuma County. Engineer Elgin B. Holt,
P. O. Box 288,
Kingman, Ariz.

Subject:

S Y N O P S I S R E P O R T

OWNER: F. C. Brewer, Bouse, Arizona.

METALS: Gold: lode and placer.

AREA & LOC.: Property consists of 5 claims covering lode and placer ground, located in the old La Paz placer area, Yuma Co.

LODE: The lode consists of a huge quartz-monzonite dike 600 feet wide by 1200 feet long, strike of which is E.& W. A stock-work of rich gold bearing quartz stringers traverse the said lode or dike in all directions, some of which have been prospected and ore removed for milling with shafts from 10 to 40 feet deep. Total mill production, per Brewer, from these workings (1930-39) approximates $12,000 in gold. This lode is one of the main sources of the La Paz placer ground found below and to the West of it; and possibly it would justify drilling with a view to determining whether it would pay to operate in a large way.

PLACERS: In addition to the above, there are three other lode claims covering a placer channel 1500 feet in length, a part of which has already been worked and the gold recovered by hand dry washers. These placers have been worked since about 1862; but there are no authentic reports available as to actual yardage indicated in the Brewer placers or the value thereof; but the same seems to warrant thorough testing by any company looking for meritorious placer ground.
